Cross-contamination is of major housekeeping concern not only in hospitals, but in schools, institutions, and industry. This formulation has been formulated to aid in the reduction of cross-contamination in these areas.

This formulation is a one-step disinfectant-cleaner that is effective against a broad spectrum of bacteria, is virucidal, fungicidal, and will prevent the growth of mold and mildew and their odors when used as directed.

This formulation is an effective one-step sanitizer-cleaner for use on non-food contact surfaces. When used as directed, this formulation will deodorize surfaces in toilet areas, behind and under sinks and counters, garbage cans and garbage storage areas, and other places where bacterial growth can cause mal odors.
