

## DIRECTIONS FOR USE

**TERMITE CONTROL:** Remove all scrap lumber and wood chips from under building. Where depth of foundation permits, without endangering footing of same, dig a trench along inside of foundation exposing its surface, approximately one foot wide and ten inches deep. Using a conventional garden watering can, dilute the Chlordane Emulsion at the rate of 14 oz. to 2½ gal. of water. FOUNDATIONS 15" - 18" deep — Apply this material evenly in the trench, using two gal. of the diluted product per five lineal feet as a trenching material. FOUNDATIONS deeper than 18" but not over 30" — Apply four gal. per five lineal feet of trench.

For buildings lacking enough clearance for trenching, it is suggested that a strong light be carried under the building in order that the tunnels built by the termites can be located. When located, destroy them, and using a hand trowel, dig a small trench on both sides of the tunnel location about six inches deep and pour in some of the above mentioned diluted material. Trenching on the outside of the footing is recommended as a measure to prevent re-infestation.

**HOUSEHOLD APPLICATIONS:** Smith-Douglass Chlordane 75% Emulsifiable Concentrate can be diluted as directed below and sprayed as a coarse spray or brushed on cracks or other areas such as window sills, floor moldings, water pipes, and other natural habitats and hiding places of the insect pests. In interior situations, the residual action of this insecticide will protect the treated premises against re-infestation for a period of at least two months. Surfaces exposed to weathering or washings should be treated periodically as needed.

**NOTICE OF WARRANTY:** The Borden Chemical Company, Smith-Douglass Division, warrants only that the contents of the container correspond to the analysis printed on the container, label, or tag: THERE IS NO WARRANTY OF MERCHANTABILITY AND THERE ARE NO WARRANTIES THAT EXTEND BEYOND SUCH ANALYSIS. Buyer assumes all risks of use, storage or handling, whether in accordance with directions or not.

NET CONTENTS

# Chlordane 75%

## EMULSIFIABLE CONCENTRATE

ACTIVE INGREDIENTS:	
Technical Chlordane*	75.00%
Aliphatic Petroleum Hydrocarbons	20.00%
INERT INGREDIENTS:	5.00%
TOTAL	100.00%

\*Equivalent to 45% Octachloro-4,7-Methano-Tetrahydroindane and 30% related compounds.

**CAUTION: KEEP OUT OF THE REACH OF CHILDREN**  
See other warnings on side panel

Distributed by **THE BORDEN CHEMICAL CO.**

Add 1 1/3 tablespoons of Smith-Douglass Chlordane 75% Emulsifiable Concentrate to one quart of water, stir, and apply as follows:

**TO CONTROL ROACHES OR WATERBUGS:** Thoroughly treat infested cracks and other hiding places. Apply locally on exposed surfaces where roaches will crawl when they come out of hiding. Repeat treatment when necessary.

**TO CONTROL ANTS:** Thoroughly treat ant trails and areas around door sills and window frames where the pests may enter the premises. It is frequently desirable to treat the openings around water pipes, heat ducts, electrical outlets and baseboards where ants may come out into rooms from wall spaces and partitions. Repeat treatments as often as necessary to maintain effective control.

**TO CONTROL SPIDERS:** Apply as wet spray along infested baseboards and corners. In basements, treat pipes, storage localities, and other areas infested. Repeat treatment where necessary.

## WARNING

Harmful if swallowed. Contact with skin can cause toxic symptoms. Avoid breathing spray mist. In case of contact with skin, wash with soap and water. Avoid contamination of feed and foodstuffs. Do not get in eyes, on skin or on clothing.

This product is poisonous to fish and wildlife. Keep out of lakes, streams and ponds. Do not apply when weather conditions favor drift of spray from areas treated. Do not apply to any area not specified on the label.

Rinse equipment and containers and dispose of wastes by burying in non-crop lands away from water supplies. Containers should be disposed of by punching holes in them and burying with wastes, or by burning (Keep out of smoke).
