Temperature should be close to 60 degrees Fahrenheit and dry should be calm. Avoid drafts from stove or fireplace. Warm, humidified air helps.

For early spring cover, the following are suggested:

For late summer and fall application and for hard to kill weeds such as: Clover, Plantain, Ground Ivy, Stink Bug, Wild Garlic, Wild Onion, Mature Mustard, Spotted Spurge and Wild Radish, use the following mix:

It is best not to reuse the sprayer for insecticides unless they are those that are to be used on turf. To clean sprayer after use, flush sprayer several times with soap and water.

WILD ONION CONTROL: Treat while young and before bulbs are formed, generally in late spring or early fall. Repeat applications the following winter or fall may be necessary.

CAUTION: May cause skin irritation. Avoid contact with eyes, skin, and clothing. Avoid breathing spray mist. Do not take internally. Stay out of the reach of children and pets. Avoid spray drift to crops/vegetables.

plants on this product may injure cotton, beans, peas, grapes, ornamentals, etc. (These species are less likely to drift.) This product is poisonous to fish. Keep out of any body of water. Thoroughly clean spray equipment with a suitable chemical cleaner before using for other purposes (or do not use same spray equipment for other purposes). Do not store near fertilizers, acids, insecticides, or fungicides. Vapors from this product may injure susceptible plants in the immediate vicinity. When container is empty, immediately wash and destroy, never reuse. Use spray equipment for applying 2,4-D combinations only for turf. Do not spray within the drip line of desirable vegetation.

RE-TREATING CONTROL: Re-treat if re-growth occurs since certain weeds—chickweed and henbit—are somewhat tolerant of the rates recommended.
