CHLORDANE

Price:

Ant & Roach Spray

(Picture)

KILLS: MOSQUITOES, ROACHES, WATERBUGS, FLIES, CRICKETS, SILVERFISH,
CLOVER MITES, CENTIPEDES

ACTIVE INGREDIENTS:

Chlordane	3.0 %
Petroleum Distillate	94.0 %
Inert Ingredients	3.0 %
	100.0 %

Net Wt. 16 oz.

WARNING: KEEP OUT OF REACH OF CHILDREN AND PETS.
See back panel for additional cautions.

DIRECTIONS:

TO OPERATE: Shake before using. Hold can upright. Remove protective cap. Point nozzle away from you. Hold container 6 to 12 inches from the area to be sprayed. Depress valve and spray surfaces until moist, usually at the rate of one foot per second. If reinfestations occur, due to migrations or removal of the residual film, repeat treatment.

ANT, COCKROACHES, CENTIPEDES, WATERBUGS, CRICKETS: Make application as a "spot" treatment to localized areas these insects may infest. Thorough application should be made around baseboards, under sinks, in basement corners, around door and window frames, ant hills and ant trails. Force the insecticide into all cracks and crevices.

CARPET BEETLES, SILVERFISH, AND FIREBRATS: "Spot" treat infested areas of the underside of floor coverings, along baseboards and cracks and under carpets where these insects may be found. "Spot" treat behind shelving, book cases, shelves of closets may also require application. Repeat in 3 to 4 weeks, as necessary.

BROWN DOG TICKS: Spot treatment should be made to infested areas in cracks and crevices and sleeping quarters of household pets and localized areas of floors and floor coverings. Fresh bedding should be placed in animal quarters following treatment. DO NOT TREAT PETS OR OTHER ANIMALS WITH THIS PRODUCT. ALLOW SPRAYED AREA TO DRY THOROUGHLY.

ACCEPTED

AUG 7

THIS PRODUCT IS A PESTICIDE
FUNCTIONING AS AN INSECTICIDE ACT
FOR ECONOMIC CONTROL. REGISTERED
UNDER NO. 773,7342 SUBJECT
TO ATTACHED COMMENTS.

MOSQUITOES, FLIES, GNATS, FLYING MOTHS, WASPS AND OTHER SMALL FLYING INSECTS: Spray outside on screen doors and windows, light fixtures and other surfaces where these insects congregate. For control of WASPS, spray nest after dark when all of the insects have returned to the nest.

CLOVER MITES, BOXELDER BUGS, SOYBUGS, BOOK LICE (PSOCIDS) SPRINGTAILS (COLLEMBOLA): Apply on and under door and window sills, along outside foundations next to the ground, around porches or wherever these pests may enter the home. Spray directly on boxelder bugs when congregated around buildings and the base of shade trees.

SPIDERS AND SCORPIONS: Spray directly on pests where possible. Treat surfaces of outbuildings where pests hide. Spray points of entry such as windowsills.

CAUTION: Harmful if swallowed, inhaled or absorbed through the skin. Wash thoroughly with soap and water after handling and before eating or smoking. Do not contaminate feed, water or foodstuffs. Keep out of the reach of children and pets. If swallowed, induce vomiting immediately and get medical attention.

Do not spray in areas where children or pets may be present. Remove pets and cover fish bowls and aquarium before spraying room. Contents are under pressure, high temperature may burst container. Do not expose to direct sunlight, radiators, stoves, hot water or other sources of heat. Never throw empty cans into fire or incinerator. DO NOT USE AS A SPACE SPRAY. Do not exceed 1½ minutes spraying time in average size room. Do not allow children or pets to contact treated surfaces until dry.

NOTICE: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use.
