Insert Resin Strip into Hole
UNDER THE FEDERAL INSECTICIDE
ACT FOR ECONOMIC POISON REGISTERED
UNDER NO. 4190-4

Do not open until ready to use.

Controls flies, mosquitoes, gnats, and other small flying insects. Use in homes, cabins, campers, garages, trailers, basements and apartments. For the control of flies in garbage cans, attach one Vaporette Insect Strip inside an average size garbage can (20 gallon capacity). One unit will be effective for the entire fly season (keep lid on garbage can.)

Directions for use:

To control flies, mosquitoes, gnats, and other small flying insects, and the reduction of silverfish, place one Vaporette Insect Strip per average room (10 x 12 x 8 feet), 1000 cu. ft. of enclosed area. Normally, this is effective for 4 months. If more than one strip is required, distribute them equally over area to be treated. Weather and other conditions, such as strong drafts may alter the performance. Replace strips if effectiveness diminishes.

NOTICE

Caution. Do not get in mouth. Harmful if swallowed. After prolonged storage, a small amount of liquid may form on the strip. Do not get liquid in eyes. Wash hands thoroughly with soap and water after handling strip. Keep out of reach of children. Do not use in nurseries where infants, ill or aged persons may be confined. Do not use in kitchens, restaurants, or areas where food is prepared or served. Not to be taken internally by humans or animals. Do not use in edible products areas of food processing plants.

Vaporette Guarantee: If you are not completely satisfied with this product as claimed, please return it to the address below for full refund.
