

Barcolene<sup>®</sup>

# POOL POWDER

## DIRECTIONS

**BEGINNING OF SEASON:** Each time pool is refilled, water should be treated with Barcolene POOL CONDITIONER which increases the effectiveness of chlorine maintenance.

**FOR CONDITIONED POOLS:** To a pH adjusted pool that has been properly conditioned with Barcolene POOL CONDITIONER, add 2 ounces (equivalent to 2 fluid ounces) of Barcolene POOL POWDER per 10,000 gallons of water. Repeat the above dosage until a chlorine residual of 1.0 — 1.5 ppm is established. Thereafter, add 1 ounce (equivalent to 1 fluid ounce) of product per 10,000 gallons of pool water daily or as needed, as determined by the use of a chlorine test kit. Residual chlorine should be maintained at 0.6 to 1.0 ppm at all time. Maintain pH between 7.2 and 7.6. Test pool water frequently.

**TO MEASURE POOL:** To determine the number of gallons of water in your pool, use this formula with distances measured in feet:

Round pool: multiply diameter by diameter by depth of water by 5.9.

Rectangular pool: multiply length by width by depth of water by 7½.

A product of  
**THE BARCOLENE COMPANY** (Swimming Pool Division)  
HOLBROOK, MASSACHUSETTS 02343  
EPA Registration No. 4255-6-1, 1965 Made in U.S.A.

**NEW CHLORINE FORMULA FOR SWIMMING POOL WATER**

free plastic  
measuring cup  
packed inside!

Available Chlorine  
60%

- provides 24-hour chlorine availability
- instantly soluble
- forms no scale
- will not produce acid or alkali build-up
- easy to use and store

ACTIVE INGREDIENT: 100% Potassium dichloro s-triazinetriene

## WARNING

### KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. A strong oxidizing agent. Contact with heat, open flame or moisture may result in fire. Avoid breathing dust and contact with skin and eyes.  
**ANTIDOTE:** Internally — take large amounts of milk, followed by olive oil or cooking oil. Externally or in eyes — immediately flood with large amounts of water. **CALL PHYSICIAN.** Rinse empty container thoroughly with water and discard.
