DIRLCTIONS

For cleaning and disinfecting floors, walls, surfaces as found in hospitals, institutions, public rooms, homes, industrial areas, conveyances, etc.

1. Apply by mop or cloth GERM-KLEEN at least two ounces diluted to one gallon of water.

In instances, i.e., operating rooms where surfaces are heavily contaminated with soil and/or organic matter, apply solution twice to ensure complete protection. For maximum germicidal and detergent activity, surfaces to be treated should be wet thoroughly.

(Where formulation shows some degree of incompatibility because of excessive use of detergent, higher concentrations may be necessary to apply).

For Cleaning and Sanitizing

Apply by mop or cloth GERN-KLEEN at least one ounce to one gallon of water. Allow at least two minutes of contact with surface before rinsing. ~

For Cleansing and Deodorizing

Apply by mop or cloth GERM-KIEEN one ounce diluted to one or two gallons of water.

CAUTION:

GERM-KLEEN is a concentrated detersent-disinfectant and must be diluted before using.

Solutions of GERM-KLEEN should not come in contact with food.

Solutions of GERM-KIDEN should not be used with soap or anionic detergents.

Avoid getting concentrate in eyes. In case of contact, wash thoroughly with water. If irritation persists, get medical attention.
