EPA Form 8570-6

Page No. 2 Registration No. 4271-10

Our specific comments on your submissions of June 16, 2002, and August 7, 2002, are listed below. As you requested, we considered the labels submitted on August 7, 2002 to be replacements for those submitted on July 16, 2002.

- 1. The Confidential Statement of Formula (CSF) dated "7-16-02" is acceptable. It describes the only formulation that may be used for this product.
- 2. In the "**RESTRICTED USE PESTICIDE**" box, change "ORGANISM" to "ORGANISMS" to make the reason for restricted-use classification read "DUE TO HAZARD TO NONTARGET ORGANISMS". We apologize for the mistake in this regard in our letter of May 28, 2002.
- 3. Immediately below the "PERSONAL PROTECTIVE EQUIPMENT (PPE)" section, insert a space between the requirements for "Applicators and other handlers" (i.e., below "shoes plus socks") and the requirements that are to be followed "When loading more ..." Insert another space between the end of the "When loading more ..." directions (i.e., after the "NIOSH ... filter" line) and the paragraph that begins with "Follow manufacturer's instructions".
- 4. Insert a space between the two paragraphs of the "USER SAFETY **RECOMMENDATIONS**" section.
- 5. Insert "waterproof" between "of" and "gloves" in the second sentence of the second paragraph of the "USER SAFETY RECOMMENDATIONS" section. Cotton gloves should not be washed before they are removed.
- 6. In the "PESTICIDE STORAGE" subsection of the "STORAGE AND DISPOSAL" section, insert "original" between "in" and "container".

The label changes prescribed above must be incorporated onto the final printed label for this product. Submit one copy of the final printed label before releasing the product for shipment. Make sure that "**POISON**" and the skull and crossbones appear in red ink against a contrasting background.

This product is registered only for the control of northern pocket gophers (*Thomomys talpoides*). This organism is reported to occur in the following States: California, Colorado, Idaho, Minnesota, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming. These are the States where use of this product would be legal (if also registered with the individual States) and, therefore, the only States in which it should be sold.

Draft label- Front Panel

RESTRICTED USE PESTICIDE

DUE TO HAZARD TO NONTARGET ORGANISM For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's Certification.

DIRECTIONS FOR USE

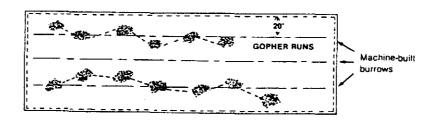

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

USE RESTRICTIONS: This product may only be used in underground applications to control northern pocket gophers (<u>Thomomys talpoides</u>) in orchards, alfalfa fields, hay fields, pastures, rangelands, and noncrop areas. Bait must be applied directly into pocket gophers' underground tunnels or into artificial burrow systems using the methods prescribed on this label. Do not apply this product above the ground surface. Do not apply this product over food and feed crops. Pick up and properly dispose of spilled bait. Do not apply this product in a way that will contact workers, other persons, pets, or domestic animals. Keep pets and other people out of the area during application.

BAITING DIRECTIONS:

<u>HAND BAITING</u>: Remove burrow plug from the flat side of the burrow fan. Using a long-handled spoon, insert one teaspoon of bait into the main runway system. Close tunnel with soil in such a manner that soil will not cover bait. Depending upon the density of burrow systems, one pound of bait will treat one to eight acres.

<u>ARTIFICIAL BURROW-BUILDER METHOD:</u> When treating extensive areas, BURROW BUILDERS may be used. Follow manufacturer's instruction for the equipment used to apply gopher bait. Make sure that machine-built burrows intersect pocket gopher burrows at the depth at which gophers have been tunneling. For greater efficiency of treatment, machine-built burrows should intersect as many gopher runs as possible at right angles. Apply bait at rates of 1 to 2 pounds per acre, using a 20' to 30' row-spacing interval. Apply only when soil condition is proper to ensure formation of a good artificial burrow.

Page 4-Draft label RIGHT SIDE PANEL – Draft Label

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store only in container, in a dry place inaccessible to children, pets and domestic animals.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Completely empty bag by shaking and tapping sides and bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of bags in a sanitary landfill or by incineration if allowed by state and local authorities.

WARRANTY: Seller warrants that this product conforms to the chemical description of the label and is reasonably fit for the purposes referred to in the directions for use. Seller makes no other warranties, express or implied, including FITNESS or MERCHANTABILITY. In no case shall the Seller be liable for consequential, special, or indirect damages resulting from the use or handling of this product. The foregoing is a condition of sale by the Seller and is acceptable as such by the buyer.
