POWDERED DETERGENT

NO. 723

CHLORINATED SANITIZER

NET CONTENTS _____ LB.

UNDER THE FEDERAL INSPECTION ACT
 U.S. DEPARTMENT OF HEALTH, EDUCATION AND WELFARE
 FOOD AND DRUG ADMINISTRATION

RECOMMENDATIONS

Powdered Detergent No. 723 is recommended for use in all food processing operations where cleanliness and bacteriostatic control are vital such as in dairies, meat processing, and canneries. No. 723 is a powerful alkaline detergent suitable for cleaning all types of pipe, tanks, and equipment. It is recommended for use in all food processing operations. For cleaning, sanitizing, and deodorizing of beverage processing equipment, valves, utensils, and all food processing equipment. No. 723 will not damage metal, glass, and plastic surfaces when used as directed.

Characteristics

Powdered Detergent No. 723 is an alkaline powdered detergent. It contains no foam producing ingredients and is therefore suitable for in-place cleaning and sanitizing as well as for circulating through food and beverage pipe lines. One (1) ounce per gallon of water provides 220 ppm available chlorine.

Application

Powdered Detergent No. 723 will clean, deodorize, and sanitize when used at one ounce per gallon of water. At this concentration, No. 723 will also brighten stainless steel. A solution of No. 723 may be applied by mop, cloth, or brush or a soak tank may be used. Where cleaning is required, pre-rinse and deodorizing and sanitizing is required. Application instructions are given on the label. All articles to be cleaned should be pre-rinsed with water.

Sodium hypochlorite-triazinetriene	10.00
Inert ingredients	90.00
	100.00

Pre-rinse with water before use. Do not use in contact with skin or eyes. If swallowed, do not induce vomiting. Seek medical attention immediately. Avoid contact with food and drink until it is swallowed. Avoid contact with eyes.

Recommendations

Powdered Detergent No. 723 is recommended for use in schools and public institutions where cleanliness and bacterial control are vital such as corridors, restrooms, showers, and cafeterias. No. 723 contains special alkaline detergent salts capable of penetrating food-type soils. It is recommended for breweries, bakeries and restaurants. For removal of proteinaceous soils found on kettles, food preparing equipment, tables, etc. No. 723 sanitizes as it cleans, thus reducing the numbers of bacteria and molds to safe levels. For cleaning, sanitizing and deodorizing food and beverage processing equipment including pipes, valves, utensils, homogenizers, tanks, etc., all food processing equipment should be rinsed thoroughly after cleaning. Powdered Detergent No. 723 will not damage metal, rubber, glass and plastic surfaces when used as directed.

Characteristics

Powdered Detergent No. 723 is an alkaline powdered detergent. It contains no foam producing ingredients and is therefore suitable for in-place cleaning and sanitizing as well as for circulating through food and beverage pipe lines. One (1) ounce per gallon of water provides 220 ppm available chlorine.

Application:

Powdered Detergent No. 723 will clean, deodorize, and sanitize when used at one ounce per gallon of water. At this concentration, No. 723 will also brighten stainless steel. A solution of No. 723 may be applied by mop, cloth or brush or a soak tank may be used. Where cleaning is not a problem and deodorizing and sanitizing are needed, a spray application is recommended. All applications should be followed by a thorough rinse.

Active Ingredients: BEST DOCUMENT AVAILABLE

Sodium Dichloro-s-triazinotriene	5.0%
Inert Ingredients	95.0%
	100.0%

CAUTION: KEEP OUT OF THE REACH OF CHILDREN
Avoid contact with skin and eyes.
In case of contact, wash thoroughly with water.
