DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Sulfodene ASPCA Flea & Tick Collar for Dogs contains chlorpyrifos insecticide, one of the longest lasting flea and tick killers available for use on dogs. This collar will reach its maximum effectiveness within 2 to 3 days after placing it on the dog and will continue to protect your dog against fleas for 12 months and ticks for 7 months. Place the collar around dog's neck, buckle and adjust for proper fit. Cut off close to the buckle and dispose of excess length. The collar must be worn loosely so that two fingers may be placed between collar and dog's neck. If collar is worn too tightly, it may produce neck irritation. Fleas and ticks present in the dog's environment that may reappear on your pet will be killed by action of this collar. Collar's effectiveness is not diminished by normal wetting such as rainfall. Use only one collar on an animal at a time.

STORAGE: Store in original unopened container away from children.

DISPOSAL: Do not reuse empty box or collar. Wrap in newspaper and put in trash collection.
