For best results, clean surface to be disinfected, then mop or spray with solution of 2 ounces disinfectant per gallon of water. Keep surface wet for at least five minutes. For moderately soiled surfaces, use 3 ounces germicide per gallon of water. Warm solutions are more effective.

This disinfectant at use-dilutions of 2 ozs. per gallon of water is effective in killing the pus germ, Staphylococcus aureus, and the typhoid germ, Salmonella typhosa, on environmental surfaces in rest homes, hotels, motels, schools, public buildings.

It is truly a wide-range bactericide that in use-dilutions has a pleasing aroma of freshly crushed mint leaves.

Use on toilets, urinals, lavatories, shower stalls, floors, walls, refrigerators, rubber and plastic surfaces. Force water from toilet bowl thru trap, using mop or force cup; pour 1-1/2 ozs. into bowl, mop all surfaces, allow to stand at least five minutes. Flush.
