

MAY 30 1991

Ms. Linda K. Kirby  
Carroll Company  
2900 West Kingsley Road  
Garland, TX 75041

Dear Ms. Kirby:

Subject: Thrifty Mint Disinfectant  
EPA Registration No. 4313-11  
Your Resubmission Dated January 22, 1991

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, is acceptable subject to the comments listed below. A stamped copy is enclosed for your records. Five copies of the finished labeling must be submitted before you release the product for shipment.

1. Revised Confidential Statement of Formula agrees with the revised enclosed label and would be acceptable.
2. In the revised label in the ingredient statement, the words "Active Ingredient" should be in singular, since the product contains only one active ingredient.
3. Remove container and pesticide disposal instructions from the precautionary statements and place them in the storage and disposal instructions.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This disinfectant at use-dilutions of 2 oz. per gallon of water is effective in killing the pus germ, Staphylococcus aureus, and the typhoid germ, Salmonella typhosa, on environmental surfaces in rest-homes, hotels, motels, schools, public buildings.

It is truly a wide-range bactericide that in use-dilution has a pleasing aroma of freshly crushed mint leaves.

For best results, clean surface to be disinfected, then mop or spray with solution of 2-ounces disinfectant per gallon of water. Keep surface wet for at least five minutes. For moderately soiled surfaces, use 3 ounces germicide per gallon water. Warm solutions are more effective.

Use on toilets, urinals, lavatories, shower stalls, floors, walls, refrigerators, rubber and plastic surfaces. Force water from toilet bowl thru trap, using a mop or force cup; pour 1-1/2 oz. into bowl, mop all surfaces, allow to stand at least five minutes. Flush.
