

This is an extremely effective cleaner and disinfectant recommended for general hospital use on floors, walls, woodwork, and equipment in all departments.

For disinfection against *Staphylococcus aureus*, *Salmonella choleraesuis*, and *Mycobacterium tuberculosis* var. *bovis* (BCG), use one ounce to each gallon of water.

For best results in disinfecting, remove heavy soil first. Apply solution; allow to remain wet for at least five minutes. Mop or wipe up.

For heavy duty cleaning, first remove loose soil. Use 2 ounces per gallon of water, mop or wipe on; allow to soak several minutes, remove.
