

DIRECTIONS

DO NOT treat more than one-third of the body surface at one time. In cases of extensive infestation, treat different areas of the body on alternate days.

GIVE THE DOG A SOAPY BATH AND DRY. APPLY S-1 TO DRY FUR & SKIN WITH GAUZE SPONGE OR COTON COVERING THE AREA TO BE TREATED AND RUB IN GENTLY. AFTER S-1 HAS DRIED, A SECOND APPLICATION IS MADE AND ALLOWED TO DRY. DO NOT BATHE THE DOG FOR AT LEAST 24 HOURS. TREATMENT MAY BE REPEATED IN 3 TO 7 DAYS.

Since demodectic mange (follicular or red mange) is difficult to diagnose and may require prolonged treatment, if no improvement is noted in ten days, consult your veterinarian.

ACCEPTED
7-10-72
43872
UNDER THE FEDERAL INSECTICIDE FUNGICIDE AND RODENTICIDE ACT FOR ECONOMIC POISON REGISTERED UNDER NO.
