

MICROCIDE CA-39

MICROCIDE CA-39 is an effective control agent for the micro organisms which impair the efficiency of recirculating water cooling systems.

Wide-spectrum activity of **MICROCIDE CA-39** controls the various bacteria and algae present in all water systems.

ACTIVE INGREDIENTS:

Poly ((oxyethylene (dimethyliminio) ethylene (dimethyliminio) ethylene dichloride)) 7.0%

INERT INGREDIENTS:93.0%

Contains 0.6 lbs. per gal. active ingredient.

CAUTION:

KEEP OUT OF THE REACH OF CHILDREN

Harmful if swallowed. Avoid contamination of food. Avoid contact with skin and eyes. In case of contact, wash thoroughly with water. If irritation persists, get medical attention. Do not reuse empty drum. Return to drum conditioner or destroy by perforating or crushing and burying in a safe place.

This product is toxic to fish. Treated effluent should not be discharged where it will drain into lakes, streams, ponds, or public water.

GALLONS NET

DIRECTIONS

Badly 'fouled' systems must be cleaned before treatment is begun. Add at a point in the system where the product will be uniformly mixed. Begin treatment when the system is in jeopardy of becoming affected or after cleaning system whose efficiency is already impaired.

Initial dose: Add 8 fl. oz. to 24 fl. oz. of **MICROCIDE CA-39** to 1000 gals. water in the system. Repeat until control is achieved.

Subsequent dose: When microbial control is evident, add 2 fl. oz. to 8 fl. oz. of **MICROCIDE CA-39** per 1000 gals. water in the system every 7 days or as needed to maintain control.
