ACTIVE INGREDIENTS:

Malathion - (O, O-dimethyl phosphorodithioate
of diethyl mercaptosuccinate).............. 2.00%
Xylene 1.41%
Petroleum Oil 96.50%
INERT INGREDIENTS 0.09%
TOTAL...100.00%

DIRECTIONS FOR USE:
For Beef Cattle

FOR USE IN BACKRUBBERS: To be used undiluted. Use in cable-type backrubbers to protect beef animals from horn flies and lice. Fly control with backrubbers is directly proportional to the coverage obtained. Locate the backrubber where the animals usually congregat such as near a water trough or salt lick so . .t it will be used frequently.

CATTLE LICE: If an adequate cable-type backrubber is used throughout the entire year, it will aid in the reduction of lice infestation on beef cattle. It will usually be necessary to relocate the backrubber to places where cattle loaf during the winter months for best results.

Do not use on dairy cattle or animals under one month of age.

PENN

BACK RUBBER OIL
2% Malathion
For the reduction of lice and hornflies on cattle.

CAUTION
KEEP OUT OF REACH OF CHILDREN

See right panel for additional precautions.
Aids in controlling horn flies, lice and gnats on beef cattle.
