Old Orchard Road  
Skokie, Illinois

DATA SHEET

Brand Name: Tempo with Crabgrass Preventer

CHEMICAL AND CULTURAL CONTROL

12-2-4

Tempo with Crabgrass Preventer is a combination of a superior pre-emergent chemical control and a complete lawn food for cultural control for crabgrass.

Tempo with Crabgrass Preventer will protect a lawn against crabgrass for an entire season while giving your lawn the early feeding required for healthy, vigorous growth.

For best results in an over-all crabgrass control program, maintain a high level of fertility on lawn areas so that permanent grasses produce dense growth and shade out crabgrass seedlings. This cultural method of control, when combined with chemical control will produce a lawn of outstanding beauty ... free from unsightly crabgrass.

DIRECTIONS

Apply, with any standard fertilizer spreader, to the lawn area in late winter or spring before crabgrass seeds have germinated. For maximum efficiency water lawn after application if no rain falls within one week. The contents of this package will treat and feed 2,000 sq. ft. of lawn area when applied using the spreader settings shown below. Tempo with Crabgrass Preventer may be applied to wet or dry lawn areas.

IMPORTANT - CAUTION

Do not apply to newly seeded lawn areas.

Do not store near seed, feed, or foodstuffs.

Do not seed within 60 days after treatment.

Do not take internally, avoid contact with eyes, and wash hands after handling or using.

LAWN CARE TIPS

For Continuous Crabgrass Control

Fertilize regularly throughout the season with Premium Tempo or Tempo Regular.
