

USE DIRECTIONS FOR FOOD EQUIPMENT & UTENSILS

FOR FOOD PROCESSING AND RESTAURANT EQUIPMENT

Cooking utensils, dishes, silverware, glasses, countertops, serving trays, refrigerators and similar type of equipment.

TO CLEAN & DISINFECT

First clean with a solution containing 3/4 ounce of Disinfectant Cleaner per gallon of water. Sanitize and deodorize the cleaned surface with a rinse solution containing 1/2 ounce of product per gallon of water. Any food contact surfaces must have a final potable water rinse.

CLEAN-SANITIZE & OR DEODORIZE

First clean thoroughly with a solution containing 3/4 ounce of Disinfectant Cleaner per gallon of water. Sanitize and deodorize the cleaned surface with a rinse solution containing 1/2 ounce of product per gallon of water. Any food contact surfaces must have a final potable water rinse.

FOR CLEANING

Lightly soiled areas-surfaces to be cleaned should be mopped or brushed with a solution containing 1 ounce of disinfectant per gallon of water. Rinse cleaned area with potable water.

Heavily soiled areas-mop or brush soiled surface with a solution containing 2-3 ounces of disinfectant per gallon of water. Rinse cleaned surface with fresh water.

GENERAL PURPOSE DISINFECTION

To disinfect walls, floors and other hard surfaces in homes, schools, restaurants, rest rooms and other public areas, mop or brush surface to be treated with a solution containing 1 ounce of disinfectant per gallon of water and then disinfect. Those surfaces which may later come in contact with food must be rinsed with clear potable water. To disinfect locker rooms, shower stalls, walkways around pools and other areas against pathogenic fungi, mop area with a solution containing 3/4 ounce in 1 gallon of water. This solution will destroy Trichophyton interdigitale, a causative agent of athlete's foot.

HOSPITAL DISINFECTION

To disinfect walls, floors, furniture and other hard surfaces in hospitals and nursing homes, mop or brush surface to be treated with a solution containing 2 ounces of disinfectant per gallon of water. Those surfaces that are heavily soiled with blood, fecal material or exudates should be thoroughly scrubbed with a solution containing 2 ounces per gallon of water and then rinsed with a fresh solution containing 2 ounces per gallon before disinfection.

SANITIZATION

To sanitize walls, floors and equipment in food processing plants, first clean thoroughly with a solution containing 3/4 ounce of disinfectant per gallon of water. If surface is heavily soiled, use disinfectant cleaner at a rate 2-3 ounces per gallon to insure thorough cleaning. Sanitize cleaned surface with a rinse solution containing 1/2 ounce of disinfectant per gallon of water. Rinse with potable water for any food contact surfaces.

DEODORIZATION

To deodorize surfaces during cleaning, mop or brush surfaces with a solution containing 2 ounces of disinfectant per gallon of water. The disinfectant is an effective antibacterial cleaner designed for use in household, industrial and institutional cleaning. When used as directed, this concentrated material will disinfect hard surfaces, such as floors, walls, counter tops and furniture. It may be relied upon to deodorize bathroom areas, garbage pails, food storage areas, kennel areas and other areas when obnoxious odors may develop. This product may be used as a general purpose antibacterial detergent in homes, schools, restaurants, hospitals, nursing homes, public rooms, food processing plants and in other places where efficient cleaning and antimicrobial action is desired. See use directions.
