Subject: Guard-All®
EPA Reg. No.4482-13
Application Dated: November 9, 2006
Receipt Date: November 17, 2006

Dear Mr. Youssef,

The following amendment submitted in connection with registration under the section 3(c)(7)(a) of Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended is acceptable with comments.

Proposed Amendment

- Update the label.

Conditions

Make the following revisions to your label:

A. Make the following changes to page one:

1. Add the following Storage and Disposal statements for containers 1 gallon or larger gallon.
Do not contaminate water, food, feed by storage or disposal.
Pesticide Storage:
Do not store on side. Avoid creasing or impacting of side walls.

COMMENTS					

Pesticide Disposal:

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these are disposed of by use according to label instruction, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal:

(Plastic containers) Triple rinse(or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities.

(Metal containers) Triple rinse(or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities by burning. If burned, stay out of smoke.

10. Add the first aid exposure route and statements:

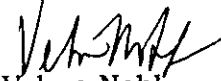

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or doctor for further treatment advice.

General Comments

A stamped copy of the acceptable labeling is enclosed. Submit one (1) copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact Velma Noble at (703) 308-6233.

Sincerely,

Velma Noble

DIRECTIONS FOR USE:

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

For use in Hospitals, Hotels, Nursing Homes, Institutional and Industrial Buildings This product is effective on all washable, hard, non-porous environmental surfaces such as metal, wood that has been sealed, plastic, concrete, glass, vinyl, glazed tile, glazed terrazzo, glazed porcelain, stainless steel, linoleum and painted surfaces. It is an effective antibacterial cleaner designed for use in household, industrial and institutional cleaning. When used as directed it will disinfect hard surfaces, such as floors, walls, counter tops and furniture. It may be relied upon to deodorize bathroom areas, garbage pails, food storage areas, and other areas where obnoxious odors may develop. This product may be used as a general purpose antibacterial detergent in schools, restaurants, hospitals, nursing homes, public rooms, food processing plants and in other places where efficient cleaning and disinfection action is desired. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

General Cleaning and Disinfecting: Dilute 1 part of this product with 80 parts (1 oz. to approx. 2 1/2 qts.) of luke-warm water. Use this solution. First remove all gross filth or heavy soil from surfaces to be treated. After surface is cleaned, mop or sponge surface to be treated, making sure surface becomes thoroughly wet. Allow to dry without wiping or allow solution to contact treated surfaces for a minimum of ten minutes prior to wiping. Excellent for removing odors, dirt and grease from floors, woodwork, sinks and basements. When used to disinfect or deodorize surfaces that come into contact with food, these surfaces must be thoroughly cleaned with detergent and rinsed with potable water prior to reuse. This product must not be used to clean the following food contact surfaces: Utensils, Glassware and Dishes.

Cleaning Toilets and Urinals: To clean restrooms, add 8 oz. to the toilet bowl and mix. Thoroughly brush over exposed surfaces and under the rim. Allow to stand for 10 minutes and flush.

For Hospital Use: remove all gross filth and heavy soil as directed above. To disinfect pseudomonas aeruginosa use 10 oz. or approximately 2/3 pint of disinfectant per one gallon of water. Thoroughly wet surfaces to be disinfected then allow solution to air dry or maintain contact with treated surfaces for 10 minutes prior to wiping.

For Non-Porous, Hard, Environmental Washable Surfaces (such as painted cabinets, doors, lawn and porch furniture, glazed porcelain surfaces, sinks, stoves, refrigerators, glazed bath tubs, glazed wash basins, garbage and trash cans, etc.): remove all gross filth and heavy soil as directed above. To disinfect, use 1.5 oz. - 2 oz. of this product for each quart of hot water and with mop or sponge thoroughly wet surface to be disinfected. Allow solution to air dry or maintain contact with treated surfaces for 10 minutes prior to wiping, then rinse with water.

For Deodorization: To deodorize surfaces during cleaning: Mop, brush or sponge surfaces with a solution containing 6 ounces of this product per gallon of water.

For Food Processing Plants: For floor to 1 gallon of water (or equivalent use if dilution is required). Apply solutions with a mop, wet all surfaces thoroughly. For sprayer, remain wet for 10 minutes. Then remove products and packaging materials must be discarded. After use, all surfaces in the area must be cleaned.

PRECAUTIONARY HAZARDS TO HUMANS

DANGER: Corrosive. Causes irreversible damage if swallowed or absorbed through the skin. Wear goggles or face shield and rubber gloves. Wash thoroughly with soap and water. Wash contaminated clothing and wash clothing separately.

ENVIRONMENTAL HAZARDS

This product is toxic to fish. Do not discharge into lakes, streams, ponds, estuaries, oceans or other bodies of water. This product meets the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified of the local sewage treatment plant. Notify the local Water Board or Regional Office of the EPA.

PHYSICAL AND CHEMICAL HAZARDS AND STORAGE

Store in original container in areas free from freezing or impacting of side walls. Do not store in areas where fire and discard in trash (or recycle).

FIRST AID

Have the product container or label with you when you get medical attention. Have doctor, or going for treatment. In case of eye contact: IF ON SKIN OR CLOTHING: Take off contaminated clothing immediately with plenty of water for 15-20 minutes. IF IN EYES: Flush with water for 15-20 minutes. Remove contact lenses, if present, and continue rinsing eye. IF SWALLOWED: Do not induce vomiting unless directed by a physician. Do not give anything by mouth to an unconscious person. NOTE TO PHYSICIAN: Probable mucous membrane irritation. Gastric lavage.
