NOTE: Changes in labeling formula differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above U.S. EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby Registered/Reregistered under the Federal Insecticide, Fungicide, and Rodenticide Act.

A copy of the labeling accepted in connection with this Registration/Reregistration is returned herewith.

Registration is in no way to be construed as an indorsement or approval of this product by this Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This registration is subject to the provisions of sections 241 and 242 of the Act, and sections 155.100 through 155.105 of the Regulations (40 CFR 155.100-155.105).

1. Submit to the Agency within 90 days of the date of registration/reregistration of your product under this Act section 2(c)(1) when the Agency requires it, registration data for similar products to which such data apply.

2. Notify the Agency and provide a copy of the label for the product to be registered for shipment:

- a. And the above EPA Registration No. address.
- b. As soon as you have the label for the product to be registered, and place with the other listed products.
- c. Label to section 2(c) for acceptable labeling and these data for registration, and a copy of the label for the product to be registered (provide the label for the product to be registered).
- d. In the label, clearly state the concentration of the product per gallon of water, and the dilution rate (e.g., 1 part to 7 parts water, not 1 part to 7 parts water).

THIS DISINFECTANT reduces the surface tension of water, improving its wettability. Microbes are capable of mass reproduction in sub-visible pores, scratches and cracks of surfaces. The excellent wettability of THIS PRODUCT improves the penetration of the use solution into areas that otherwise might not be reached.

THIS DISINFECTANT is effective against a wide variety of gram-positive and gram-negative bacteria. It is also an excellent deodorant and is especially effective in controlling odors that are bacterial in origin. Has a pleasant lemon odor.

THIS DISINFECTANT mixes with water to form clear, stable use solutions. Use solutions are non-corrosive and non-staining to plastic, vinyl, synthetics, enamel, tile and most common metals.
