

**DEODORIZES AND DISINFECTS IN ONE OPERATION
FOR USE AS A DISINFECTANT**

This disinfectant should always be diluted with water before using as the use of the concentrated disinfectant may cause irritation to the skin. If irritation should develop, avoid further contact with the solution by use of rubber gloves.

Be sure all dirt is swept up and removed before applying disinfectant, and make sure disinfectant solution comes in contact with all contaminated areas.

To disinfect floors, cellars, basements, toilet rooms, bathrooms, lavatories, urinals and sinks, clean thoroughly: use 2½ ozs. of this preparation to every gallon of water; mop in regular manner. If it is impractical to mop specific places, use 4 ounces per gallon of water and spray thoroughly over entire surface. Rinse empty container thoroughly with water and discard it.

Germa-Phene may be used to disinfect in homes, hotels, motels, schools and public buildings.

To disinfect kitchen tables, drainboards, marble, tile, linoleum, limestone, glass, rubber, syrup cans, soda fountains, refrigerators, cooling rooms, refrigerator cars, garbage cans, rinse thoroughly with a dilution of 2½ ozs. of this product to a gallon of water after cleansing in regular manner, allowing contact for five minutes.

For more drastic conditions such as disinfection of exceptionally dirty urinals and garbage cans, a most thorough cleaning must be done by use of strong cleaning solutions, removing all dirt, then make sure disinfectant comes in contact with all contaminated areas; disinfect with a solution of 5 ounces of disinfectant per gallon.

Rinse all food contact surfaces and equipment with potable water before reuse.

Floors: It is recommended that a few ounces of this disinfectant be added to the scrub water or rinse water to provide pleasant mint-odored deodorizing while the floor is being cleaned. This disinfectant in the rinse water also acts as a germicide.

General Disinfection: For disinfecting purposes dilute this product 1 to 100 with water. Each gallon makes 100 gallons of powerful disinfecting solution.

FOR USE IN CONTROLLING THE SPREAD OF ATHLETE'S FOOT FUNGI

Two ounces in one gallon of water is recommended for scrubbing shower room floors, locker room benches, runways, bath mats and other surfaces commonly contacted by the bare feet.

CAUTION

Poisonous if taken internally

If accidentally swallowed, give the following antidotes: milk, raw egg, mucilage, and follow with an emetic (tablespoonful of mustard in glass of warm water). Call a physician.

Avoid inhalation of fumes of undiluted product, as well as contact with the skin and eyes. In case of contact, wash with large quantities of water. If eye irritation persists, obtain medical attention.

Keep away from children, domestic animals and foodstuffs.
