DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

CL-14 is a concentrated product and must be diluted before using. Recommended for use on pre-cleaned surfaces, in food processing, milk manufacturing, dairy farms and restaurants.

PREPARATION: Remove gross soils by flushing with water, scraping or brushing. Pre-clean all surfaces. Rinse thoroughly with potable water.

SANITIZING HARD NON-POROUS SURFACES (glass or stainless, fillers, pipelines, silos, processing vats, bulk tanks and utensils): To sanitize previously cleaned equipment and utensils dip, brush or spray equipment with solution of CL-14 at 1 ounce to 10 gallons of water. Provides 100 ppm available chlorine. Allow at least 2 minutes contact time. Allow equipment to drain well, blow or air dry. Fresh solutions should be prepared daily or when solution appears dirty. For mechanical applications, used sanitizing solutions may not be reused for sanitizing applications. Do not let chlorine level fall below 50 ppm.

POROUS NON-FOOD SURFACES (Wood or Concrete): Use 600 ppm Available Chlorine after cleaning. This applies to sanitizing such surfaces in egg processing plants, hatcheries and institutions. Mix only with water. Do not mix with acids.

DILUTION TABLE

Weight of Sanitizer	Gallons of Water	Parts per Billion Available Chlorine
1 oz.	20	50 ppm
1 oz.	10	100 ppm
6 oz.	10	600 ppm

1 Level Cap Full = 1/2 ounce
