INSTRUCTIONS FOR LIQUID SANITIZING OF EGGS AFTER WASHING OPERATION

Rinse water containing Chloro-Rinse should be at least 10° warmer than wash water.

Never let minimum strength of sanitizing solution, including Chloro-Rinse, drop below 100 P.P.M. of available chlorine at the time eggs are rinsed.

100 P.P.M. equals 1 oz. Chloro-Rinse in 10 gals. water.

#### CONTENTS\_

CAUTION --- POISON Causes Skin Irritation Harmful if Swallowed

Antidote: External Wash with water.

Antidote: Internal Drink Mucilage, Raw Egg White, Milk or Rice Gruel. Follow with Emetic (tablespoon of mustard in tumbler of warm water).

Call a Doctor.

#### KEEP OUT OF REACH OF CHILDREN

The active ingredient in this material is chemically unstable, as it must be to perform effectively as a sanitizer. It will tend to decompose with time especially at elevated temperatures.
