

LYON LIQUI-CHLOR

NET CONTENTS: _____ GALLONS

POOL WATER

INITIAL DOSAGE:

1 oz. per 1,000 gallons of pool water for 1 ppm available chlorine.

Repeat above dosage until a chlorine residual of 0.6 to 1.0 ppm available chlorine has been established as determined by the use of a chlorine test kit.

SUBSEQUENT DOSAGE:

Maintain chlorine at 0.6 to 1.0 ppm as determined by suitable chlorine test kit. Test frequently and for each 0.1 ppm chlorine that should be added use 1 ounce Liqui-chlor per 10,000 gallons of pool water.

Active Ingredient

12 oz. Sodium Hypochlorite

Inert Ingredient:

87 1/2%

100%

This product is a potent oxidant. It may cause skin and eye irritation and must be kept in a cool, dry place. It will tend to decompose with time, especially at elevated temperatures. Use a test kit and increase dosage as necessary to obtain required level of available chlorine.

WARNING — KEEP OUT OF REACH OF CHILDREN Harmful If Swallowed

Strong Oxidant. May produce chemical burns. Do not get on skin or in eyes. Do not use ammonia or other bowl cleaners with this product. To do so will release hazardous gases.

WARNING

Causes Skin Irritation and Severe Eye Irritation

First Aid:

In case of skin and eye contact, flush with plenty of water. If skin irritation persists, get medical attention. For eyes, get prompt medical attention. Internal — give milk, water, or egg whites. Call a physician immediately.

Rinse empty container with water and discard it.

BATH HOUSE MAINTENANCE

Spray on walls, area to be treated with solution containing

1 ounce per gallon of water. Do not concentrate on one spot.

Scrubbing is necessary to remove dirt and grime.

Use a test kit to determine chlorine level.

Use a test kit to determine chlorine level.
