

DIRECTIONS FOR USE

TREATMENT (Small enclosed industrial areas, such as parking lots, tank farms and substations.) For weed and grass control up to one year or more, use 2 to 2½ gals. of PENITE-8 in sufficient water (usually 20 gal. or more depending on equipment) to uniformly cover 1000 square feet. For best results the material should be applied in early spring before growth starts. If the area to be treated is quite dry, better results will be obtained by wetting the soil before applying the PENITE-8 spray. For areas not to be covered by pavement after treatment, do not use rates in excess of 6¼ gallons PENITE-8 (50 pounds of arsenic trioxide equivalent) per acre.

Commercial or Industrial use only—PENITE-8 solution is an excellent control agent for termites and prevents costly termite damage. PENITE-8 is odorless, making it especially suited for use in unexcavated areas beneath buildings and other places where odors are objectionable. Apply PENITE-8 in a trench varying in depth up to 15 inches for shallow footings, to 30 inches for deep footings.

Make an 8% arsenic trioxide solution (equivalent to 11% sodium arsenite or 1 lb. sodium arsenite per gallon) by adding 1 gal. of PENITE-8 to 10½ gal. of water. Apply this solution at a rate of 2 gal. per 10 linear feet of trench for shallow footings or 4 gal. per 10 linear feet of trench for deep footings. Evenly distribute the required amount of solution in approximately equal portions starting at the bottom of the trench and on layers of soil at 6-inch intervals as the trench is being refilled. Solution should contact foundation up to and including ground level. Do not treat areas near springs or wells used for drinking purposes. Arsenic in the soil is toxic to plant growth. Do not use around homes.

PENITE-8 is useful in thinning stands of timber. To kill trees, cut gashes with an axe or pick at 3-inch intervals around the trunk. Make up a solution of one pint PENITE-8 to one gal. of water. Apply one tablespoon of this solution to each gash. Resprouting of freshly cut stumps may be prevented by applying the above solution liberally to the cut surfaces.

DANGER! POISONOUS IF SWALLOWED

Avoid contact with skin, eyes and clothing.
Do not breathe spray mist; wear respirator.
Wash thoroughly after using.

ANTIDOTE—CALL A PHYSICIAN IMMEDIATELY!

INTERNAL: Give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Then two tablespoonfuls of Epsom Salt or Milk of Magnesia in water and plenty of milk and water. Have patient lie down and keep quiet.

EXTERNAL: In case of contact remove contaminated clothing and immediately wash skin with soap and water.

DANGER

Do not use or store in or around the home.
Do not allow domestic animals to graze treated area.
Keep children, pets, livestock, and poultry away from treated areas.
Do not store or use in aluminum as highly toxic arsine gas may be formed.
Do not reuse this container for any other purpose.
PENITE-8 is not selective in action. Avoid contact with or drift to desirable plants or crops.
Do not apply to soil underlaid with roots of desirable plants.

Do not contaminate water used for irrigation or domestic purposes.

This product is toxic to wildlife. Birds and other wildlife in treated areas may be killed. Do not apply where runoff is likely to occur. Do not contaminate water by cleaning of equipment or disposal of wastes.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

Burn or bury containers; never re-use. Stay out of smoke or fumes.
