Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under
EPA Reg. No. 4581-139

(Right panel PENNSALT Aquathol label)

HOW TO APPLY

AQUATHOL is a contact killer; consequently, do not apply before weeds are present. Application as early as possible after weeds are present is recommended to permit use of lower application rates. However, for best results water temperature should be at 65° or above. If an entire pond is treated at one time, or if the dissolved oxygen level is low at time of application, decay of weeds may remove enough oxygen from the water, causing fish to suffocate. Water containing very heavy vegetation should be treated in sections to prevent suffocation of fish. Sections should be treated 5-7 days apart. Carefully measure size and depth of area to be treated and determine proper amount of AQUATHOL to apply from chart. For best results apply on a calm day when there is little wave action.

AQUATHOL should be sprayed on the water or injected below the water surface and should be distributed as evenly as possible. AQUATHOL may be applied as it comes from the container or diluted with water depending on the equipment. Some dilution will give better distribution.

In instances where the nuisance to be controlled is an exposed surface problem (i. e., filamentous algae mats and some of the broadleaved pond weeds) it is important to get good contact coverage utilizing the highest concentration (least water dilution) compatible with the type of equipment used so that even distribution is achieved.

CAUTION

- Avoid contact with or drift to other crops or plants as injury may result.
- Wash out spray equipment with water after each operation.
- Do not store this material where it might contaminate seeds, feed or foodstuffs.
- Do not use treated water for irrigation or for agricultural sprays on food crops or for domestic purposes within 7 days of treatment.
- Do not use fish from treated water for food or feed within 3 days of treatment.
- Necessary approval and/or permits should be obtained in states where required.
- For best results treat areas of one acre or more and/or margins of at least 100 ft. in large bodies of water.

NOTE: Areas treated with AQUATHOL may be used for swimming 24 hours after treatment.

WARNING

- MAY BE FATAL IF SWALLOWED.
- IRRITATING TO SKIN, NOSE, EYES AND THROAT.
- MAY BE ABSORBED THROUGH SKIN.
- KEEP OUT OF REACH OF CHILDREN.

Do not get in eyes, on skin or on clothing. Avoid breathing spray mist. Bathe and change clothing at least daily while using. In case of contact, immediately flush skin or eyes with plenty of water for at least 15 minutes; for eyes get medical attention. If swallowed, give cold milk or cold water. Call a doctor immediately.

NOTICE
