### GENERAL INFORMATION

ZIRAM 76DF is effective against many fungal diseases and is non phytotoxic to labeled crops. It is compatible with most commonly used pesticides and adjuvants. It may be used with systemic fungicides, such as TOPSIN® M, for broad spectrum disease control and can be used in Integrated Pest Management (IPM) programs.

#### **DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Do not apply this product through any type of irrigation system.

GENERAL USE PRECAUTIONS

For dilute applications, use ZIRAM 76DF at the recommended rate per 100 gallons:

For aerial applications, use ZIRAM 76DF in a minimum of 10 gallons of spray per acre; for concentrate ground applications, use a minimum of 20 gallons of spray per acre.

For both ground and aerial applications, always use sufficient water to provide thorough coverage.

Use the high label rate under severe disease pressure or when conditions promote rapid disease development.

Maximum application is for a crop cycle. Crop cycle can be defined as pre-bloom through postharvest.

Do not graze or feed cover crops from treated orchards.

## AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
