

DIRECTIONS—READ PRECAUTIONS BEFORE USING COTTON INSECT CONTROL: For control of boll weevils, beet worms, cotton aphids, cotton fleahoppers, cotton leafworms, fall army worms, lygus and other insects, spider mites and thrips apply 1 to 1½ pints per acre depending on size of cotton plant and insect infestation.

MP-ENDRIN E-1.6-1.6 should be applied when first signs of insects appear and continued at 5-day intervals until insects are under control. Thoroughly apply recommended amount in sufficient water to give adequate coverage (usually 3-10 gal. per acre depending on number of nozzles per row and spray equipment). Mix thoroughly and apply when plants are dry and wind not more than 15-20 mph. Use 40-60 psi pressure for best results.

Do not apply within 5 days of hand picking. Do not graze dairy animals or animals being finished for slaughter on treated fields.

WARNING

DANGER! POISONOUS IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN. RAPIDLY ABSORBED THROUGH SKIN—REPEATED EXPOSURE MAY, WITHOUT SYMPTOMS, BE INCREASINGLY HAZARDOUS.

DO NOT GET IN EYES, ON SKIN, ON CLOTHING
Wear clean, heavy natural rubber gloves, goggles and clean water-proof or freshly laundered protective clothing (coveralls, cap, etc.). Destroy and replace gloves frequently. Wash hands, arms, and face thoroughly with soap and water before eating or smoking. Bathe immediately after work and change all clothing. Wash clothing thoroughly with soap and hot water before re-use. In case of contact, immediately remove all contaminated clothing and flush skin or eyes with plenty of water for at least 15 minutes. For eyes get medical attention.

DO NOT BREATHE VAPOR OR SPRAY MIST
Wear a mask or respirator of a type passed by the U. S. Department of Agriculture for endrin-methyl parathion protection. Airplane pilots should wear full-face canister-type mask. If handled indoors provide mechanical exhaust ventilation.

DO NOT CONTAMINATE FEED AND FOODSTUFFS
Bury spillage; clean up area with strong lye solution.

KEEP ALL UNPROTECTED PERSONS OUT OF OPERATING AREAS OR VICINITY WHERE THERE MAY BE DANGER OF DRIFT. VACATED AREAS SHOULD NOT BE REENTERED UNTIL DRIFTING INSECTICIDE AND VOLATILE RESIDUES HAVE DISSIPATED. WORKERS ENTERING TREATED FIELDS WITHIN 5 DAYS AFTER TREATMENT SHOULD BE PROTECTED. DO NOT APPLY OR ALLOW TO DRIFT TO AREAS OCCUPIED BY UNPROTECTED HUMANS OR BENEFICIAL ANIMALS.

HIGHLY TOXIC TO FISH AND WILDLIFE. DO NOT APPLY TO ANY AREA NOT SPECIFIED ON THE LABEL. DO NOT CONTAMINATE ANY BODY OF WATER NOR APPLY WHEN CONDITIONS FAVOR DRIFT OR RUNOFF FROM THE CROP AREA TREATED. THIS PRODUCT IS HIGHLY TOXIC TO BEES EXPOSED TO DIRECT TREATMENT OR RESIDUES ON CROPS. PROTECTIVE INFORMATION MAY BE OBTAINED FROM YOUR COOPERATIVE AGRICULTURAL EXTENSION SERVICE.

NET CONTENTS GALLONS

**MP-ENDRIN
E-1.6-1.6**

(Contains 1.6 lb. Methyl Parathion, and 1.6 lb. Endrin per gallon)

| | |
|--|---------------|
| ACTIVE INGREDIENTS: | |
| O,O-dimethyl O-p-nitrophenyl thiophosphate* | 18.3% |
| Endrin (hexachlorocyclohexaene, endo-dimethanonaphthalene) | 18.3% |
| Xylene base aromatic solvent | 59.9% |
| INERT INGREDIENTS | |
| *Methyl Parathion | 3.5% |
| TOTAL | 100.0% |

ATROPINE IS ANTIDOTAL—CONSULT PHYSICIAN FOR EMERGENCY SUPPLY

ANTIDOTES: If swallowed. Give a tablespoonful of salt in a glass of warm water and repeat until vomit fluid is clear. Have victim lie down and keep quiet. Call a Physician immediately. If on skin. In case of contact remove contaminated clothing and immediately wash skin with soap and water.

FIRST AID TREATMENT: Consult your physician at once in all cases of suspected endrin-methyl-parathion poisoning.

Remove patient immediately from the area where methyl parathion is present. If symptoms or signs of poisoning include blurred vision, abdominal cramps and tightness in chest, don't wait for a doctor but give two atropine tablets (each 1/100 gr.) at once.

NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON

PHYSICIANS' NOTE: Warning symptoms include weakness, headache, tightness in the chest, blurred vision, non-reactive pin-point pupils, salivation, sweating, nausea, vomiting, diarrhea and abdominal cramps.

TREATMENT: Give atropine, preferably by injection, grains 1/100 two or three tablets at once and parenterally or orally every hour as required up to 30 tablets or until pupils dilate. Never give morphine. Clear chest by postural drainage. Artificial respiration or oxygen administration may be necessary. Observe patient continuously 48 hours. Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until time for cholinesterase regeneration has been allowed as determined by blood tests.

DESTROY CONTAINER WHEN EMPTY

Flush out thoroughly with water in some location where flush water can be run off harmlessly. Then punch container full of holes or crush so that it cannot be used again for any purpose. Take to city dump or other location where no attempt will be made to salvage for any use whatsoever.

FLAMMABLE

Keep container closed and away from heat and open flame.
