Hydrothol 191 Granular EPA Reg. No. 4581-172

DIRECTIONS FOR USE IN CALIFORNIA ONLY

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Under the Federal Insecticide, Fungicide, and Herbicide Act, as amended, for the pesticide registered under 4581-172, HYDROTHOL 191 GRANULAR is a formulation of a submerged aquatic weed killer for use in rice fields to control Southern Naiad (*Najas guadalupensis*), American Pondweed (*Potamogeton nodosus*), Horned Pondweed (*Zannichellia palustris*), Sago Pondweed (*Potamogeton pectinatus*), and Coontail (*Ceratophyllum demersum*).

TIME OF APPLICATION

Apply 25 to 60 days after sowing, when aquatic weeds are present. Do not apply before rice emerges above surface of water. Do not apply after rice starts heading. Do not apply HYDROTHOL 191 GRANULAR more than once yearly.

RATE OF APPLICATION

The ideal average depth of water at time of application is 6 to 8 inches; however, based on depth, use rates as follows:

Depth of Water in Inches	Lbs. HYDROTHOL 191 GRANULAR Per Acre	ppm Acid Equivalent
4 - 6	40	2.2 - 1.5
6 - 8	50	1.9 - 1.4
8 - 10	60	1.7 - 1.4

APPLICATION EQUIPMENT

Apply with ground or air equipment designed for uniform distribution of granules. Clean out application equipment after each use.

Necessary approval and/or permits should be obtained if required. Consult State Fish and Game agencies before applying this product.

CAUTION

Do not release water from flooded fields within 10 days of application. Carefully read regular product label and follow appropriate precautions and directions.
