# AQUATHOL PLUS GRANULAR

## For Aquatic Weed Control

### ACTIVE INGREDIENTS:

Dipotassium Salt of Endothall\* 5.1%

Potassium Salt of Silvex\*\* 5.6%

INERT INGREDIENTS 89.3%

TOTAL 100.0%

\*3,6-endoxohexahydrophthalic acid—equivalent 3.6%

\*\*[2-(2,4,5 trichlorophenoxy) propionic acid] equivalent 5.0%

Licensed for use under one or more of the following patents:  
2,390,941; 2,396,513; 2,472,347; 2,550,494; 2,576,080;  
2,576,081; 2,576,083; other patents pending

KEEP OUT OF REACH OF CHILDREN

### WARNING

### Approximate lbs. AQUATHOL PLUS GRANULAR FOR ONE ACRE TREATMENT\*

	1.0 ppm	2.0 ppm	3.0 ppm	4.0 ppm	5.0 ppm	6.0 ppm
1 ft. deep	26	51	77	103	128	154
2 ft. deep	51	103	154	206	257	308
4 ft. deep	103	206	308	411	514	617
6 ft. deep	154	308	463	617	771	925

\*One acre equals 208 x 208

### FOR 1,000 SQ. FT. TREATMENT

	1.0 ppm	2.0 ppm	3.0 ppm	4.0 ppm	5.0 ppm	6.0 ppm
1 ft. deep	6	12	18	24	30	36
2 ft. deep	12	24	35	47	59	72
4 ft. deep	24	47	71	94	118	142
6 ft. deep	35	71	106	142	177	213

Where the area to be treated is greater than those listed in the charts, proceed as follows:

- Compute the approximate surface acreage.
- Compute the average depth.
- Multiply a. by b. to determine the total number of acre/feet.
- Multiply the pounds required at the 1 foot depth under the rate to be used by the number of acre/feet to determine total quantity to be used.

### ADDITIONAL INFORMATION

In areas containing heavy dense vegetation the area should be treated in sections so as to prevent the death of fish from suffocation due to the decaying vegetation using up a large portion of the oxygen present in the water.

Apply when the water temperature is 65 F or above for best results.

Normally the treated areas will remain free from weeds for the entire season; however, under some conditions regrowth may occur and an additional application may be necessary. If retreatment is made, apply no later than six (6) weeks prior to freezing weather.

For best results treat areas of one acre or more and or margins of at least 100 feet in large bodies of water.

### CAUTION

Apply only in accordance with State and local regulations. Obtain permits where required. To avoid the possibility of injury to crops and contamination of water intended for use by animals, do not apply to water used for irrigation, agricultural sprays, or most water supply for watering dairy animals or animals being fed for slaughter.

Treated water may be used for watering turf.

Do not use fish from treated water for food or food within three days of treatment. Do not use fish for bait, insecticide, or fungicide. Avoid drift to susceptible plants. Clean application equipment not used for any other purpose.

Do not apply treated water to AQUATHOL PLUS GRANULAR may be used for watering turf.

### WARNING

Keep away from children and pets. May be fatal if swallowed or inhaled.

Do not get on eyes or in mouth. Avoid breathing dust. If dust is in eyes, flush eyes immediately with plenty of water for at least 15 minutes and get medical attention. If swallowed, drink plenty of water. If swallowed, do not induce vomiting. Get medical attention immediately. Do not get on skin. Wash immediately if on skin.
