

DECCO SALT NO. 7

Wettable Powder for Control of Molds Causing Decay of  
Cantaloupe After Harvest.

ACTIVE INGREDIENTS (Tetraiodoethylene).....77.75%

INERT INGREDIENTS.....22.25%

DIRECTION FOR USE

To be used in treating packed crates of cantaloupes in a  
Decco cantaloupe applicator and in Decco WT-7 Cantaloupe  
Wax at time of application to cantaloupes. Recommended  
treating range should be between 1,000 and 2,500 ppm  
tetraiodoethylene.

**DANGER!** CAUSES EYE BURNS. Do not get in eyes. Avoid  
inhalation. Keep container closed. Use with  
adequate ventilation. Wash thoroughly after  
handling. Harmful if swallowed. Keep out of  
reach of children.

FIRST AID: In case of contact, immediately  
flush eyes with plenty of water for at least  
15 minutes. Call a physician.
