

DECCOQUIN[™] CONCENTRATE

For postharvest use to prevent scald on apples and pears in storage.

Active ingredient:

Ethoxyquin* (6-ethoxy - 1,2-dihydro - 2,2,4-trimethyl quinoline)

Inert ingredients:

52.2%

47.8%

100.0%

Bryan, Texas 77801

DIRECTIONS FOR USE:

To make a treating concentration of 2700 ppm ethoxyquin, add 1 part of Deccoquin[™] Concentrate to 200 parts of water.

Add Deccoquin[™] Concentrate to the dip tank or drencher tank while filling with water and mix thoroughly. Excess foaming can be prevented by adding a small amount of silicone antifoam to the water before adding the Deccoquin[™] Concentrate.

Do not use on Golden Delicious Apples.

After treatment, be sure to tip bins to drain thoroughly before placing fruit in cold storage.

Deccoquin[™], diluted to 2700 ppm ethoxyquin, can also be applied to pears and apples as a spray on a brush bed or conveyor rolls.

For best control of scald, apply to apples and pears no later than one week after harvest. Change solution daily, or oftener as needed. Avoid undue exposure of concentrate and diluted Deccoquin[™] to light to avoid darkening. However, darkening does not adversely affect scald control properties of product.

WARNING:

KEEP OUT OF REACH OF CHILDREN

Harmful if swallowed. May cause skin irritation. Avoid prolonged or repeated skin contact. Wash thoroughly after handling. In case of contact, wash immediately with soap and water.

Do not contaminate water by cleaning of equipment or disposal of wastes.

Dispose of used Deccoquin in municipal waste systems.
