#### PRECAUTIONARY STATEMENTS

##### Hazards to Humans and Domestic Animals

CAUTION: Avoid contact with eyes, skin and clothing. Avoid breathing spray mist. Do not use as a space spray. Do not apply to humans, their clothing or bedding. Do not spray animals with this product. Do not allow children or pets to contact treated surfaces until spray dries. Cover fish tanks prior to application. After handling wash thoroughly. Wash contaminated clothing before re-use. Do not contaminate food, feedstuffs, or domestic water supply. Do not spray where electrical short circuits might result, e.g. wall outlets, conduits, etc.

#### STATEMENT OF PRACTICAL TREATMENT

If swallowed - Call a physician or Poison Control Center immediately. Drink one or two glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Do not induce vomiting or give anything by mouth to an unconscious person.  
If on skin - Wash thoroughly with soap and water.  
If in eyes - Flush eyes thoroughly with water.  
Get medical attention if irritation occurs due to contact with this product.  
NOTE TO PHYSICIAN: Atropine is antidotal only if symptoms of cholinesterase inhibition are present.

#### GENERAL INFORMATION

ENOX OUT Formula One controls fleas, flies, ants, crickets, cockroaches and silverfish in and around domestic buildings. Due to its controlled-release nature, the product gives excellent residual kill of the listed pests, however, effective knockdown may take up to 24 hours after application. ENOX OUT Formula One can be sprayed on any surface which will not be damaged by water. A visible residue may occur on some dark surfaces. This residue can be minimized by applying to these surfaces as lightly as possible with a fine spray and a sweeping motion. Visible residues can be removed with a damp cloth or sponge. On porous surfaces such as unfinished wood, use a brush to remove dried residue.

#### REGULATORY STATEMENT

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH LABEL PRECAUTIONARY STATEMENTS AND DIRECTIONS. EPIBENT INC., CHICAGO, ILL.

SHAKE WELL BEFORE USE AND OCCASIONALLY DURING USE  
TO ASSURE EVEN COVERAGE

Fleas - Evenly apply to pet beds and resting quarters, adjacent cracks and crevices, baseboards, carpets and floor coverings, between and under cushions of upholstered furniture, and other areas where these pests may be present. Entire carpets may be treated. Applications to most surfaces should be as light as possible, approximately 1 pint per 200 square feet. It may be necessary to use a higher volume of spray, approximately 1 pint per 100 square feet, on long, dense shag carpets. Old bedding of pets should be replaced with clean, fresh bedding after treatment. Animals should not be sprayed with this product.

Cockroaches and Silverfish - Make spot applications to and behind baseboards, drawers, shelves, around water pipes, storage areas, closets, behind and under cabinets, refrigerators, sinks, stoves, and similar areas where these insects hide.

Ants - Make spot applications to baseboards, window frames, cracks and crevices, and similar hiding or habitation areas. Apply to trails, around doors and windows, and other areas where these pests may crawl or enter the premises.

Crickets - Make spot applications to baseboards, behind and under cabinets and appliances, and other hiding places. Areas around doors and water pipes should be treated to help prevent crickets from entering the premises.

Flies - Make spot applications to window frames, screens, and similar areas where these pests may congregate.

#### STORAGE AND DISPOSAL

STORAGE: Store in original container where the product cannot contaminate water supplies, food or feedstuffs, preferably in a locked storage cabinet. Do not allow to freeze.

DISPOSAL: When empty, securely wrap original container in several layers of newspaper and discard in trash.
