

LYNDE JET-FOG SPRAY

FOR OUTDOOR CONTROL OF ADULT MOSQUITOES USING
DYNA-FOG JET FOGGERS.

An effective ready-to-use insecticide for use in Drive-In Theaters, Resorts, Golf Practice Ranges, Amusement Parks, Recreational Areas, Camps, Beaches, Picnic Areas, Mosquito Control Districts and similar outdoor areas.

ACTIVE INGREDIENTS 100%

Methylated Naphthalene Derivative†

~~Beta-butoxy beta-thiocyano diethyl ether~~
Malathion*

†A special designed petroleum product for thermal fogging outdoors.

*O, O-dimethyl dithiophosphate of diethyl mercapto succinate.

DIRECTIONS

Apply a barrier strip of insecticidal fog around the perimeter of area to be treated approximately 15 minutes before infiltration of mosquitoes (which is usually at dusk). Follow with fog applications at 200 to 250 foot intervals within the perimeter to achieve maximum fog coverage utilizing wind direction. Air must be relatively still to maintain desired fog pattern as only partial control is obtained when wind is blowing over six miles per hour. Repeat as often as necessary. Read Instruction Manual for regulation of insecticide out-put.

KEEP OUT OF

CAUTION REACH OF CHILDREN

Store in cool place. Keep container sealed. Do not pour, spill or store near fire or flame. Cover exposed foods before spraying. Harmful if swallowed. Keep out of reach of children. Avoid heavy applications of fog to valuable ornamental plants, may be toxic to certain species of fish, particularly in shallow water. Avoid prolonged breathing of fog; in case of spillage on skin, wash with soap and water. Avoid contamination of feed and food-stuffs.

Since the use of this material is beyond the control of the seller, seller makes no warranty of any kind, express or implied, concerning the use of this product.
