

**DIRECTIONS FOR POOL USE:**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Crystal-Chlor 1" Tablets containing 89% available chlorine, are designed to dissolve slowly (up to several days) and provide a steady source of available chlorine in swimming pools. Tablets control growth of algae and effectively kill many bacteria thus helping to keep the pool in a sanitary condition. One tablet weighs approximately 1/2 ounce. If any chlorine residual is present, it is possible to increase the residual in pool water by 0.7 p.p.m. by using two tablets per 10,000 gallons of water.

For best results, use a dissolving basket, a floating container, or add the tablets to a plastic leaf strainer in the surface skimmer. Do not permit tablets to contact plastic pool linings or metal objects. Do not throw tablets directly into pool.

**START UP:**

In a clean pool with no visible algae, bring chlorine residual to 1.0-1.5 p.p.m. as follows:

1. For each 10,000 gallons of water, add four Crystal-Chlor 1" Tablets (approx. 2 oz.) in a plastic leaf strainer in the surface skimmer.
2. Run pump and filter until totally dissolved (approx. 1 1/2 days).
3. Test for chlorine residual, using a suitable test kit.
4. If chlorine residual is below 1.0 p.p.m., continue to add Crystal-Chlor 1" Tablets at a rate of one per 10,000 gallons, wait until dissolved and check residual. Pool can be used when residual is between 1.0 and 3.0 p.p.m.
5. The day after the pool's chlorine residual reaches 1.0-1.5 p.p.m., use cyanuric acid to stabilize your pool. Follow label directions. Adjust pH to the ideal range of 7.2-7.6.

**REGULAR CARE**

Use four Crystal-Chlor 1" Tablet (approx. 2 oz.) for each 10,000 gallons of water every other day or as needed to maintain the pool's chlorine residual from 1.0-1.5 p.p.m. Use skimmer or floater.

**CRYSTAL-CHLOR 1" TABLETS  
CONCENTRATED POOL  
CHLORINATING TABLETS**

Active ingredient: Trichloro-s-triazinone 99.9%  
Inert ingredients: 0.1%  
Available Chlorine: 89%

- Protects against bacteria and algae
- Stabilized (Sun Protected) for extended chlorine life
- Slow dissolving
- Totally soluble

FEB 9 1984

For use in skimmers and floaters. (Do not add directly into pool. Avoid metal objects. Use only in skimmer or floater which has been thoroughly cleaned. Do not mix with other chemicals in skimmer or floater.)

**Precautionary Statements**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Irritant. Causes severe eye irritation. May cause respiratory irritation. Avoid contact with skin. Avoid breathing dust. Avoid contact with clothing. Wash thoroughly with soap and water after handling. Do not get into eyes, nose or mouth. If contact occurs, flush with water for 15 minutes. If irritation persists, consult a physician. Do not use near food or feed. Do not use in areas where children or pets play. Do not use in areas where food is stored. Do not use in areas where food is prepared.

**CHEMICAL HAZARDS:**

**DANGER:** Irritant. Causes severe eye irritation. May cause respiratory irritation. Avoid contact with skin. Avoid breathing dust. Avoid contact with clothing. Wash thoroughly with soap and water after handling. Do not get into eyes, nose or mouth. If contact occurs, flush with water for 15 minutes. If irritation persists, consult a physician. Do not use near food or feed. Do not use in areas where children or pets play. Do not use in areas where food is stored. Do not use in areas where food is prepared.

**ENVIRONMENTAL HAZARDS:**

Do not discharge into waterways. Do not discharge into storm drains. Do not discharge into sewers. Do not discharge into landfills. Do not discharge into areas where children or pets play. Do not discharge into areas where food is stored. Do not discharge into areas where food is prepared.

**ADDITIONAL POOL CARE RECOMMENDATIONS:**

**pH -** Maintaining pH in the ideal range of 7.2-7.6 is extremely important to the efficacy of your chlorine and swimming comfort. Test for pH often with a suitable test kit. Adjust pH as necessary, using products such as pH Up or pH Down.

**SUPERCHLORINATION -** Superchlorination with Crystal-Granular is recommended to burn out the organic material your filter can't handle and keep your water sparkling clear. Use as directed below especially during excessive heat, when bathing loads are high, when water becomes dull looking or hazy, when there is a "chlorine" like smell or excessive eye irritation, or after heavy rains.

**SHOCK TREATMENT -** If algae appear add 28 Crystal-Chlor 1" Tablets (approx. 14 oz.) in the skimmer for each 10,000 gallons of water. Run pump and filter until totally dissolved (approx. 1 1/2 days). Thoroughly clean pool by scrubbing surface of algae growth, vacuum, and cycle through filter. Pool should not be used until chlorine residual is from 1.0-3.0 p.p.m.

**TO DETERMINE POOL CAPACITY:**

**Rectangular Pools:** Multiply length x width x average depth x 7.5 = pool capacity (U.S. gallons)  
**Round Pools:** Multiply radius (1/2 diameter) x radius x average depth x 2.35 = pool capacity (U.S. gallons)

**STORAGE AND DISPOSAL:** Keep product dry in tightly closed container when in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash container or dispose in approved landfill area or bury in a safe place.  
**INCIDENTAL HANDLING:** In case of contamination or decomposition, do not re-enter container if possible. Isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.
