

Crystal-Chlor Granular

It is a violation of Federal law to sell this product in a manner inconsistent with the following:

Crystal-Chlor granular containing 5% available chlorine is designed to dissolve quickly and completely. Granules control growth of algae and effectively kill many bacteria thus helping to keep the pool sanitary.

Scatter directly over surface of pool. Each ounce of product will provide approximately 0.4 p.p.m. of available chlorine in 10,000 gallons of water.

START UP:

In a clean pool with no visible algae, bring chlorine residual to 1.0 - 1.5 p.p.m. as follows:

1. Add 1/2 cupful (approx. 3 oz.) of Crystal-Chlor Granular for each 10,000 gallons of water.
2. Test for chlorine residual, using a suitable test kit.
3. If chlorine residual is below 1.0 p.p.m., continue to add Crystal-Chlor granular at a rate of 1 oz. per 10,000 gallons until the level is reached.

The day after your chlorine residual reaches 1.0 - 1.5 p.p.m., use cyanuric acid to stabilize your pool. Follow label directions. Adjust pH to the ideal range of 7.2-7.6.

MAINTENANCE:

Add 1/2 cupful (approx. 3 oz.) of Crystal-Chlor Granular for each 10,000 gallons every other day, or as needed to maintain your chlorine residual from 1.0 - 1.5 p.p.m.

STORAGE AND DISPOSAL: Keep product dry in tightly closed container when not in use. Store in a cool, dry well-ventilated area away from heat or open flame. Do not reuse empty container. Rinse empty container thoroughly with water to dissolve all material before discarding. Place in trash, collection or dispose in approved landfill area or bury in a safe place.

EMERGENCY HANDLING: In case of contamination or decomposition, do not reuse container. If possible, isolate container in open and well-ventilated area flooded with large volumes of water. Dispose of contaminated material in an approved landfill area or bury in a safe place.

CRYSTAL-CHLOR GRANULAR

CONCENTRATED STABILIZED POOL CHLORINATING GRANULES

Active ingredient	
Sodium Dichloro-s-Triazinetrione	
Dihydrate	99%
Inert Ingredients	1%
Available Chlorine	55%

- Protects against bacteria and algae
- Stabilized (Sun Protected*) for extended chlorine life
- Fast dissolving
- Totally soluble

First Aid:
Inhalation: Remove person to fresh air. Get immediate medical attention.
Eye Contact: Flush eyes with water for at least 15 minutes. Get immediate medical attention.
Skin Contact: Wash with soap and water. Get immediate medical attention.
Ingestion: Drink water. Do not induce vomiting. Get immediate medical attention.
If swallowed: Drink large amounts of milk or water and induce vomiting if you are able to do so.
If on Skin: Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.
In Eyes: Flush with cold water for at least 15 minutes. Get immediate medical attention.
Inhalation: Remove person to fresh air. Get immediate medical attention.

ENVIRONMENTAL HAZARDS:
This product is toxic to fish. Keep out of lakes, ponds or streams. Do not contaminate water by cleaning of equipment or disposal of wastes.

ADDITIONAL POOL CARE RECOMMENDATIONS:
pH - Maintaining pH in the ideal range of 7.2-7.6 is extremely important to the efficacy of your chlorine. Test for pH after every chlorine contact. Test for pH after with a suitable test kit. Adjust pH as necessary, using pH adjusters such as pH up or pH down.

WATER CHLORINATION: Superchlorination with Crystal-Chlor granular is recommended to burn out the organic matter in your filter, lift handle and keep your water sparkling clear. Use as directed below especially during excessive heat, when bathing loads are high, when water becomes cloudy, during hot days, when there is a lot of rain like splash of excessive eye irritation, or after heavy rain.

WATER TREATMENT: If algae appear, shock treat your pool with 1/2 cupful (approx. 3 oz.) of Crystal-Chlor Granular for each 10,000 gallons of water. Allow the chlorine to start work for 24 hours. The dead algae will float to the bottom.

WATER TREATMENT: If algae appear, shock treat your pool with 1/2 cupful (approx. 3 oz.) of Crystal-Chlor Granular for each 10,000 gallons of water. Allow the chlorine to start work for 24 hours. The dead algae will float to the bottom.

WATER TREATMENT: If algae appear, shock treat your pool with 1/2 cupful (approx. 3 oz.) of Crystal-Chlor Granular for each 10,000 gallons of water. Allow the chlorine to start work for 24 hours. The dead algae will float to the bottom.
