GENERAL DIRECTIONS

Muncy-Chief Seed Corn Protectant Contains 0.84 oz. of Heptachlor per pint of solution. Apply at the rate of 1/2 pint per bushel of Seed Corn for the temporary protection of germinating Seed Corn and Seedlings from attack by Wireworms, Seed Corn Maggot and Seed Corn Beetle. Place the seed corn in a suitable container or in corn planter. Pour the repellent over it and mix thoroughly.

Dry Seed when using with plastic plates to avoid damage to the plastic plates. Not necessary to dry seed when steel plates are used. Treat seed at recommended dosages. Do not use treated seed for food or feed.

WARNING FLAMMABLE Keep away from heat and open flame. Do not smoke while treating seed. Use with adequate ventilation.

CAUTION: HAZARDOUS IF SWALLOWED, INHALED OR ABSORBED THROUGH SKIN. AVOID CONTACT WITH SKIN. Wash thoroughly with soap and water after handling. Avoid breathing of vapors.

In case of spillage on person or clothing, immediately remove clothing and flush skin or eyes with plenty of water; for the eyes get medical attention.

INTERNAL If any of the insectide is swallowed, give a table spoon of salt in a glass of warm water. Make vomit. Repeat until vomit fluid is clear. Call a **DOCTOR IMMEDIATELY**.

NOTICE TO PHYSICIAN: In case of poisoning, administer barbiturates as for anti-convulsant therapy. Observe patient carefully since repeated treatment may be needed.

Do not apply or allow to drift to areas occupied by unprotected humans or beneficial animals. To protect fish and wildlife, do not contaminate streams, lakes or ponds with this material. Do not reuse empty container. Destroy it by perforating or crushing. Bury or discard in a safe place away from water supplies.

For the protection of germinating seeds and seedlings from attack by Seed Corn Maggot, Seed Corn Beetle and Wireworms. MUNCY-CHIEF Seed Corn Protectant can be used directly on the seeds as a liquid treatment.
