

DIRECTIONS FOR USE

General:

Apply with a low-pressure sprayer equipped with a coarse spray nozzle. Spray surfaces only until wet. Avoid excessive run-off. Apply to all insect breeding sites and harborage. Also treat adjacent exposed surfaces where insects may crawl when they come out of hiding. Repeat treatment as necessary.

The under sill
Cockroaches - Thoroughly treat the infested area. Spray baseboards, cracks and crevices; around window and door frames; the under surfaces of shelves, drawers and work tables; behind and beneath cabinets, refrigerators, sinks and stoves; in and around waste containers, switch panels, junction boxes, floor drains and other places where cockroaches hide or rest.

Ants - Apply to trails and places where ants enter premises such as window and door sills. Spray hills and unways outdoors. *Sills*

The under sill
Caddis, Cigarette Beetles, Dermestids, Drugstore Beetles, Indian Meal Moths, Mediterranean Flour Moths, Red Flour Beetles, Saw-toothed Grain Beetles and Weevils (exposed stages) - Thoroughly treat floors and the walls of the infested area with attention to cracks, crevices, corners and perimeters. Sanitation and dust control are of primary importance. Fumigate or destroy infested products.

Silverfish, Firebrats and Paperlice - Apply to localized areas infested by these insects.

Brown Dog Ticks - Spray sleeping quarters of pets, around baseboards, window and door frames, wall cracks, and local areas of floors. Repeat as needed. Fresh bedding should be placed in animal quarters after spraying. Do not spray animals.

Over Mites, Crickets, Earwigs, Millipedes, Centipedes, Sowbugs, Scorpions, and Spiders - Thoroughly spray the interior and exterior perimeter of the infested premises. For Clover Mites give special attention to window sills.

outdoors
Fleas, Flies, Gnats, Mosquitoes, Punkies and Sandflies (outdoors only) - Spray infested areas thoroughly including outside surfaces of screens, doors, window frames, foundations, and other areas where insects may enter.

For Use in Meat Packing and Food Processing Plants: Do not use in commercial food preparation areas of meat packing plant and food processing plants. Use only in the inedible product areas of meat packing (including those that are Federally inspected) and food processing plants. Do not use where exposed food products, equipment, or packaging materials are being stored. Treat food processing plants early in the season before canning or other processing begins. Repeat applications, if necessary, when plant is not in operation. Spraying unloading docks and outside areas where insects congregate will aid in preventing re-infestation. Good sanitation and proper disposal of wastes is essential in any effective insect control program.

RESIDUAL SPRAY

Contains BAYGON
For Industrial and Institutional Use

ACTIVE INGREDIENTS:	
Isopropoxyphenyl methylcarbamate	1.00%
Petroleum Distillate	84.00%
INERT INGREDIENTS:	
	15.00%
	100.00%

U.S. Patent No. 3,111,539

This material used under license from Chemagro Corporation

Baygon is the registered trademark of Farbenfabriken Bayer A.G. Chemagro Corporation license.

Magic Circle Residual Spray is a highly effective ready-to-use formulation for control of the insects listed below including those resistant to certain chlorinated hydrocarbon and phosphate insecticides. This product drives insects from their hiding places, gives rapid kill and long residual activity.

Kill: Ants, Brown Dog Ticks, Centipedes, Cockroaches, Clover Mites, Crickets, Earwigs, Firebrats, Millipedes, Paperlice, Scorpions, Silverfish, Sowbugs, and Spiders. Exposed stages of Caddis, Cigarette Beetles, Dermestids, Drugstore Beetles, Indian Meal Moths, Mediterranean Flour Moths, Red Flour Beetles, Saw-toothed Grain Beetles and Weevils.

Also for outdoor control of Fleas, Flies, Gnats, Mosquitoes, Punkies and Sandflies

CAUTION

KEEP OUT OF REACH OF CHILDREN

See side panel for additional CAUTION statements

NET CONTENTS GALLONS

IMPORTANT: Read these entire Directions and Conditions of Sale, including the Notice provision, before using Magic Circle Residual Spray.

CONDITIONS OF SALE: These Directions for Use reflect the opinion of experts based on tests of effectiveness, of toxicity to plants and laboratory animals and of residues on or in food and feed under normal conditions of use. However, because of the wide range of conditions under which this product may be used, even though label directions are followed, it is impossible to eliminate all risks associated with its use because of abnormal conditions beyond the control of the seller. J. C. Ehrlich Chemical Co., Inc. and the Seller offer, and the Buyer uses, this product subject to the understanding that the Buyer assumes all such risks.

RESTRICTIONS

Do not use as a space spray. Provide adequate ventilation of area being treated. Do not allow children to contact treated areas until surfaces are thoroughly dry. Do not store near feed or food products. Avoid contamination of feed, food, food processing equipment, and food handling surfaces. Do not apply to animals. Remove pets and cover fish bowls before spraying. Do not spray plants. Do not apply to rugs, carpets, draperies, wallpaper, or similar materials that may be stained. Avoid excessive wetting of plastic, rubber and asphalt surfaces such as tiles and floor coverings.

CAUTION

May be harmful if swallowed, inhaled, or absorbed through the skin. Do not get in eyes, on skin, or on clothing. In case of contact, wash immediately with soap and warm water. Wash hands, arms, and face thoroughly with soap and water before eating or smoking. Wash all contaminated clothing with soap and hot water before re-use.

Should illness occur, get prompt medical aid. To Physician: Atropine sulfate is antidotal.

CONTAINER DISPOSAL

Do not reuse container. Destroy it by perforating or crushing. Bury or discard in a safe place.

NOTICE

Sellers guarantee shall be limited to the terms of the label, and subject thereto the buyer assumes any risk to persons or property arising out of use of handling and accepts the product on these conditions.

CRACK AND CREVICE TREATMENT IN FOOD PROCESSING
amount of material directly into cracks and crevices such as joints, up
joints between different elements of construction, between equipment,
bases and the floor, wall voids or hollow equipment legs where cock-
roaches, ants, spiders and silverfish hide. Also, in cracks and crevices
nests (exposed staves of sawtooth grain beetle, flour beetle, rice
weevil, cigarette beetle, drugstore beetle and in sawtooth beetle
core in contact with stored surfaces. These insects are able to crawl
depositing the product into and on surfaces of equipment and material
into the line. Also, the application of food grade insecticide is recommended.

Application of this material in the food processing facilities
establishments, other than those mentioned above, is not recommended.
