

DIRECTIONS FOR USE

This is a concentrate and must be diluted with base oil before fogging. To each one-half gallon of concentrate add 90 gallons of No. 2 diesel oil and mix thoroughly. Follow the directions in the manual of your fogging equipment for best results. Do not mix with water as this is not an emulsifiable concentrate.

OUTDOOR FOGGING: Apply diluted solution of fogging concentrate at the rate of one gallon per acre. The fog should be directed over the entire area. Particular attention should be given to areas where flies congregate such as fences, walls of buildings. Animals may be present during treatment of feedlots. Avoid direct application to exposed feed and water. Do not apply the fog where food or feed crops are growing. Not for use on home lawns.

FOR CONTROL OF FLY MAGGOTS: In maggot breeding areas such as garbage dumps and manure piles, apply at the rate of 1.2 gallon of diluted solution per 100 sq. ft. Do not contaminate water, feed or foodstuffs, milk or milking utensils. Repeat as necessary. Birds feeding on treated areas may be killed.

FOR ANIMAL BUILDINGS: Apply as a fog inside buildings at rate of 1 gallon of diluted solution per 32,000 cubic feet. Dairy and beef cattle and horses may be present during application. Do not use this solution for fogging purposes in areas where animals have received direct application within eight hours. Do not contaminate water, feed, milk or milking utensils.

POISONOUS TO FISH AND WILDLIFE: This product is toxic to fish and wildlife. Do not apply when weather conditions favor drift from areas treated. Do not apply where runoff is likely to occur. Do not contaminate any body of water by direct application, cleaning of equipment or disposal of wastes.

This product is highly toxic to bees exposed to direct treatment or residues on crops. Protective information may be obtained from your Cooperative Agricultural Extension Service.

COMBUSTIBLE MIXTURE - DO NOT POUR, SPILL, OR STORE NEAR FIRE OR HEAT

DANGER: May be fatal if swallowed, inhaled or absorbed through the skin or eyes. Do not get on skin, in eyes, or on clothing. Do not breathe fumes. Wear rubber gloves, protective clothing and goggles when handling concentrate to prepare solution. In case of contact, remove contaminated clothing and wash skin thoroughly with soap and water. For eyes, flush with plenty of water, get medical attention. If poisoning should occur, CALL A PHYSICIAN IMMEDIATELY. ATROPINE AND 2-PAM ARE ANTIDOTAL. Wash thoroughly after handling and before eating or smoking. Do not contaminate feed, foodstuffs or drinking water. Do not use inside homes or where milk is stored or processed. Avoid breathing of spray mist. During fogging or mist spraying applications wear a mask or respirator approved by the U. S. Bureau of Mines for use with DDVP. Wash all contaminated clothing with soap and hot water before reuse. Keep all unprotected persons out of operational area.

DANGER  POISON

Burn or destroy containers, never reuse. Stay out of smoke or fumes. Bury spillage in non crop area away from water supplies. Clean up area with strong lye solution.

DDVP 10 POUND OIL SOLUTION

To Be Used Only By Public Health Officials,
Mosquito Abatement Districts
And Pest Control Operators.

DANGER !  POISON !

KEEP OUT OF REACH OF CHILDREN. See Side Panels for Antidote and Other Required Warning Statements.

ACTIVE INGREDIENTS:

2,2-dichlorovinyl dimethyl phosphate (DDVP).....	83.78%*
Related Compounds	6.31%*
Aromatic Petroleum Derivatives.....	9.91%
Total	100.00%

*Equivalent to 90.09% w Technical DDVP Insecticide.
Contains 10 lbs. active ingredient per gallon.

ANTIDOTE AND FIRST AID: In case of emergency, obtain an adequate quantity of 2-PAM immediately. Administer 2-PAM immediately in all cases of poisoning.

INTERNAL: If the material has been inhaled, remove patient from exposure immediately. This may be done by giving warm salt water to drink (1/2 cup of water). Repeat until vomited. Do not induce vomiting. NOTHING BY MOUTH TO BE GIVEN.

EXTERNAL: If the material has been on skin, immediately remove patient from exposure. Remove all contaminated clothing. Wash with running water. If the material has been in the eyes, flush with running water for at least 15 minutes.

IF WARNING SYMPTOMS APPEAR: Administer 2-PAM (10 mg/ml) or ATROPINE (1 mg/ml) immediately. See Warning Statement for further instructions. Do not transport the patient without medical attention.

NOTE TO PHYSICIAN: Watch for weakness, headache, dizziness, and other symptoms of atropine poisoning. Do not give morphine or other respiratory depressants.

TREATMENT: Attention is directed to the fact that DDVP is a potent respiratory irritant and may be fatal if inhaled. Administer 2-PAM (10 mg/ml) or ATROPINE (1 mg/ml) immediately. Do not give morphine or other respiratory depressants. Oxygen administration should be continued until patient is breathing spontaneously. If necessary, artificial respiration may be administered. Do not give morphine or other respiratory depressants. If necessary, artificial respiration may be administered. Do not give morphine or other respiratory depressants.

NOTICE: See warnings, directions for use, and other information on the label. Ingredient statement on the label is for informational purposes only. Application equipment will vary. Those stated on this label are typical.

EPA REG. NO. 4715-212

Net Contents: 10 lbs. Gal

DDVP 10 POUND OIL SOLUTION

To Be Used Only By Public Health Officials,
Mosquito Abatement Districts
And Pest Control Operators.

DANGER !  POISON !

**KEEP OUT OF REACH OF CHILDREN. See Side Panels for
Antidote and Other Required Warning Statements.**

ACTIVE INGREDIENTS:

2,2-dichlorovinyl dimethyl phosphate (DDVP).....	83.78%*
Related Compounds	6.31%*
Aromatic Petroleum Derivatives.....	9.91%
Total	<u>100.00%</u>

*Equivalent to 90.09% w Technical DDVP Insecticide.
Contains 10 lbs. active ingredient per gallon.

ANTIDOTE AND FIRST AID TREATMENT: Atropine is the emergency antidote for DDVP poisoning. Consult your physician about obtaining an adequate supply of 1-100 gram atropine tablets for emergency use. 2-PAM is also antidotal and may be administered in conjunction with atropine. **CALL A PHYSICIAN IMMEDIATELY IN ALL CASES OF SUSPECTED POISONING.**

INTERNAL: If the material has been swallowed, induce vomiting immediately. This may be done by introducing a finger into the throat or by giving warm salt water (1 tablespoon of salt to a glass of water). Repeat until vomit fluid is clear. **NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON.**

EXTERNAL: If the material has been spilled on the skin, immediately remove patient from the vicinity of the insecticide, remove all contaminated clothing, and wash skin with soap and running water. If the material gets into the eyes, wash them liberally with running water for at least ten minutes. Get medical attention.

IF WARNING SYMPTOMS APPEAR: Administer two 1-100 gram atropine tablets immediately. **NEVER ADMINISTER ATROPINE OR 2-PAM UNLESS WARNING SYMPTOMS APPEAR.** (See Warning Symptoms below). Keep patient prone and quiet. Start artificial respiration immediately if patient is not breathing. Transport the patient immediately to the nearest physician.

NOTE TO PHYSICIAN: Warning Symptoms: Startle, fatigue, weakness, headache, tightness in chest, dizziness, non-tremor, dry mouth, rapid exhalation, sweating, nausea, vomiting, diarrhea and abdominal cramps.

TREATMENT: Atropine is the specific therapeutic antagonist of toxic acetylcholinesterase inhibition. If there are signs of para-sympathetic stimulation, atropine sulfate should be injected at 10 minute intervals, in doses of 1 to 2 milligrams, until complete atropinization was occurred. 2-PAM chloride is also antidotal and may be administered in conjunction with atropine. **DO NOT GIVE MORPHINE OR TRANQUILLIZERS.** Clear chest by postural drainage. Oxygen administration may be necessary. Observe patient continuously for 48 hours. Repeated exposure to cholinesterase inhibitors may, without warning, cause prolonged susceptibility to very small doses of any cholinesterase inhibitor. Allow no further exposure until cholinesterase regeneration has been attained as determined by blood test.

NOTICE: Seller warrants that this product conforms to the ingredient statement on the label. Since conditions of use, such as weather, compatibility with other chemicals, and condition of application equipment will vary, Seller makes no claim other than those stated on this label.
