THIS LUXURY SHAMPOO FOR DOGS AND CATS CONTAINS NEW SILICONES. TANGLES BRUSH OUT EASILY AND COAT DRIES TO A HIGH GLOSS.

"Fleas will be killed if shampoo is left on five minutes before rinsing".

DIRECTIONS: Wet fur with water, small amounts at a time. Rub in well, starting at head and working back. Add more water and more shampoo if needed to make a rich foam lather. Rinse with plain water.

This shampoo contains no alkali. It rinses clean. Lanolin is added for increased lustre and to improve texture of fur.

CAUTION: When washing cats, kittens or puppies, dry immediately with cloth to prevent chilling. Do not use on kittens or puppies under 4 weeks of age. Avoid getting shampoo in animals eyes.

ACTIVE INGREDIENTS: Triethanolamine Lauryl Sulphate, 20.00 %; "Diethanolamide of Lauric" and Myristic Acids", 4.50 %; Poloxyethylene Sorbitan Monopoleate, 1.00 %; Lanolin 1.00 %; Pyrethrins, 0.10 %; * Technical Piperonyl Butoxide, 0.50 %.

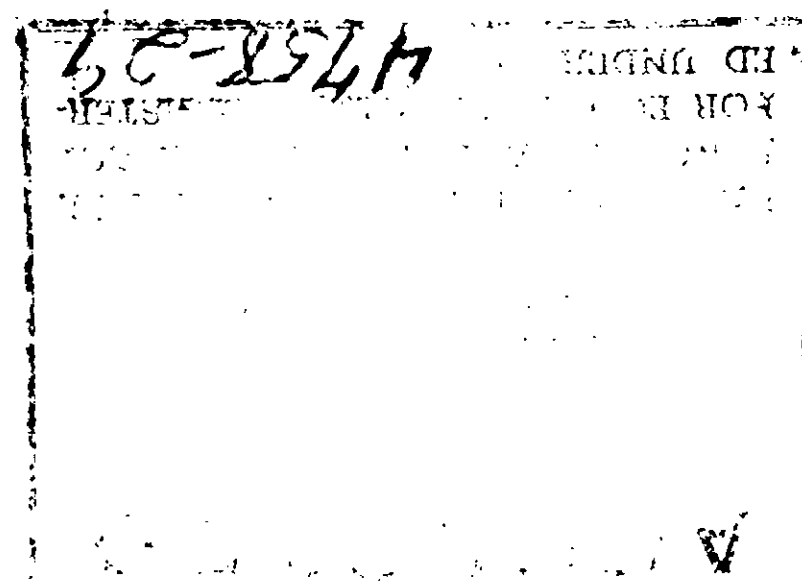

INERT INGREDIENTS: 72.90 % Equivalent to 0.40 % (Butylcarbitol) (6-Propylpiperonyl) ether and 0.10 related compounds.

EPA. Reg. # 4758-29

JUN 4 1991

Dear Mr. Williams:

Subject: Formula revision, label revision
Holiday Flea Shampoo for Dogs & Cats
EPA Registration Number 4758-29
Submissions dated July 16, 1990; September 4, 1990

The amendments referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, are acceptable subject to the comments listed below. A stamped copy of the product label is enclosed for your records.

1. Regarding the CSF, the upper and lower certified limits must be calculated based upon the pure active ingredient rather than the technical or concentrate.
2. Regarding columns 13b and 14b of the CSF, the lower certified limits and the % by weight should not be the same for all inert and active ingredients. There should be some variation between 13b and 14b for all components.
3. Provide the chemical identity of all components, the percentage composition, CAS Registry Number, and the Material Safety Data Sheet (MSDS) for the formula ingredient "Perfume Bouquet G-D 7180".

It is understood that the compound lanolin is not being supported for use as an active ingredient in the pesticide reregistration process. The use of this compound as an ingredient in the product formulation is no longer consistent with the terms of registration of this pesticide.

Sincerely,

 Richard F. Mountfort
Product Manager 10
Insecticide-Rodenticide Branch
Registration Division (H7505C)
