

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

CAUTION

Do not use in nurseries or rooms where infants, ill or aged persons are contained. Do not install directly over or within 12 feet of any food handling or dispensing area. Large drafts or forced ventilation may reduce or eliminate the insecticidal efficacy of these installations.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not puncture. Do not use or store near open flame. Exposure to temperatures above 130°F may cause bursting. Never throw container into fire or incinerator.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

STORAGE: Do not store near heat or open flame.

DISPOSAL: Do not reuse empty container. Wrap container and put in trash collector.

FOR USE IN AUTOMATIC DISPENSERS: One dispensing unit should be installed for each 6,000 cubic feet of space to be treated. The Dispenser activates the 54 mg. valve once every 15 minutes; after two hours of operation, enough insecticide is suspended in the air to kill a substantial proportion of the flies, mosquitoes and gnats present. Usually the effectiveness will be noticeable within one hour after the Dispenser is activated. If less than 24 hour control is required, the

Dispenser should be set to start one hour before control is desired and run one hour after control is no longer needed. Keep in mind that such factors as air flow rate, size of space treated, humidity and room temperatures all affect insect activity and control. Therefore, one unit per 6,000 cubic feet should be considered as an average need with adjustments made depending on specific conditions of place of usage. As with any method of insect control, best results are achieved when sanitation and other positive insect-prevention practices are followed.

This 6-1/2 oz. can of insect killer contains approximately 3,400 "shots" sufficient to sustain operation for a total of 850 hours (35 days on around the clock basis or 70 days on a 12 hour basis). When used on a 24 hour basis, it is suggested that the container be changed once a month (once every 2 months on a 12 hour basis).

ONE-TWO-THREE Economy Insecticide contains a highly effective insecticide formulation specifically designed for use in automatic mist dispensing units around food handling establishments, food processing establishments, restrooms, dining rooms and restaurants where flies, gnats, flying moths, and mosquitoes are an annoyance.

Can No. 1-21

EPA Est. No. 4758-FL-1

Manufactured by

PET CHEMICALS INC.

7781 N.W. 73rd Court, Miami Springs, FL 33166

**ONE • TWO • THREE
ECONOMY INSECTICIDE**

ACTIVE INGREDIENTS

Pyrethrin	1.0%
Piperonyl butoxide, technical	2.0%
N-Octyl bicycloheptene dicarboximide	3.0%
Petroleum hydrocarbons	44.0%
INERT INGREDIENTS	50.0%
	100.0%

*Equivalent to 1.6% (butylcarbitol) (6-propyltolperonyl) ether and 0.4% related compounds

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panel for additional precautions.

Net Wt. 6.5 oz. (184 gms.)
