Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is unconditionally registered in accordance with FIFRA sec. 3(c)(5). Once a pesticide is registered, however, it is not regarded as permanently acceptable. Registration does not eliminate the need for continual reassessment of pesticides. If the Agency determines that, at any time, additional data are required to maintain in effect an existing registration, the Agency will require submission of such data under FIFRA section (3)(c)(2)(B).

1. Make the following label changes:

- a. Revise the EPA Registration Number to read, "EPA Reg. No. 4758-163".
- b. In the directions for use with respect to ticks, mites and lice, delete the word "rapid." Data support claim for rapid control of fleas only.
- c. Add the following statement to the directions for use:

"Do not use on old, sick or debilitated animals."
- d. Delete the claim "Residual control of fleas up to eight days." Efficacy data submitted does not support the claim and it is also in conflict with the statement "repeat treatment in 3 days if necessary."

Signature of Approving Official:

George T. LaRocca
George T. LaRocca

Date: JULY 7, 1995

- e. Delete the phrase "Contains the Botanically-Derived Insecticide: ~~Linalool~~." Statements relative to composition indirectly implying safety of the product are not acceptable.
- f. Under "IF ON SKIN" revise second statement to read "Get medical attention if symptoms or irritation develop."
- g. Revise Environmental Hazards Statement to read as follows:

"This pesticide is toxic to fish and other aquatic organisms. Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of washwaters. Apply this product only as specified on the labeling."

- h. With respect to the product name "Flea Stop" I reiterate my earlier opinion that the word "Stop" is misleading in that it implies a cessation of a flea problem on animals when in fact the product will only control fleas for a specific period of time in fact for possibly only 3 days as currently labeled. In addition the name is also misleading in that it implies flea control when in fact the product claims control of other pests. While I understand your reasoning, I am not persuaded to change my previous position that the term is unacceptable. However, since you stated that "FLEA STOP" is a brand name in your product line, I would not object to the name "Flea Stop Brand." This qualifier should adequately characterize the term Flea stop as a brand name and as such no longer misleading.

2. Submit three copies of the revised final printed label for the record.

A stamped copy of the label is enclosed for your records.

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash contaminated clothing before reuse. Avoid contamination of feed, food, and utensils. Use with caution on nursing animals. Do not treat puppies or kittens under 8 weeks of age. Some individuals or pets may be sensitive to this product. If irritation develops, discontinue use.

ENVIRONMENTAL HAZARDS

Do not apply directly to water. Do not contaminate water by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

STATEMENT OF PRACTICAL TREATMENT

IF SWALLOWED- Call a physician or Poison Control Center. **IF ON SKIN-** Wash with plenty of soap and water. Get medical attention. **IF IN EYES-** Flush with plenty of water. Get medical attention if irritation persists.

ZONE CONTROL:

To effectively control fleas, a total management program is recommended. You should treat the areas where fleas live with the Flea Stop 4-Step Program which consists of: *Step 1*-Shampoo/Dip the pet; *Step 2*- Treat the home and yard; *Step 3*- Flea & Tick collars on the pet; *Step 4*- Maintenance Sprays and Powders. Ask your pet care professional for specific recommendations on how to best control fleas for the comfort and well being of your pet and family.

DIRECTION

It is a violation of Federal law to use this product in a manner inconsistent with directions.

SHAKE WELL

DOGS AND CATS: Dilute in 1 gallon of water. Mix for 8 hour period. For rapid mites and lice, sponge or animal, thoroughly wetting fur, on ears, legs and paws, rinse, but allow to dry naturally. Young animals immediately chilling. Wash hands with soap and water after using. Avoid contact with genitalia. Do not treat kittens under 8 weeks of age.

Repeat treatment in 3 days

STORAGE AND

STORAGE: Do not store in cold areas. Thaw and shake well. **DISPOSAL:** Do not reuse. Thoroughly, wrap container in newspaper and discard in trash.
