**FIRST AID (Cont'd)****HOT LINE NUMBER**

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-877-757-4943 for emergency medical treatment information.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**SHAKE WELL BEFORE USING**

One 16 ounce canister contains enough powder to treat 1 to 2 rooms (200-400 square feet). When using this powder at the lower rate, allow the powder to remain in place for 24 hours before vacuuming. Apply to dry surfaces only. Do not wet powder. Apply powder more heavily to areas of flooring or furniture on which the pet spends most time.

**CARPETS:** Shake powder evenly across surface. Brush lightly with broom to force powder deep into carpet where fleas, their larvae, and eggs exist. Wait at least 60 minutes before (lightly) vacuuming to remove visible surface powder. For maximum efficacy, delay vacuuming for up to 24 hours.

**UPHOLSTERY:** Remove loose cushions. Sprinkle along creases and into corners. Brush lightly to work powder into folds and creases. Vacuum to remove visible powder on surfaces. Do not use on exposed fabric without first testing on a hidden surface for effects on color (staining) or texture. If powder adheres to a spot, brush out and vacuum that area immediately.

When emptying vacuum bag after use, wrap contents or disposable bag in several layers of newspaper and discard in trash.

Treat pets with a registered flea and tick control product prior to re-entry.

**STORAGE AND DISPOSAL**

**STORAGE:** Store in a cool, dry area inaccessible to children and pets.

**DISPOSAL:** If empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

This container is sold by weight, not volume. You can be assured of proper weight even though some settling of contents normally occurs during transportation and handling.
