PRECAUTIONARY STATEMENTS Hazards To Humans & Domestic Animals

Harmful if swallowed. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product as a space spray, apply only when the plant is not in operation.

Environmental Hazards

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not contaminate water by cleaning of equipment or disposal of wastes by cleaning of equipment or disposal of wastes. Apply this product only as specified on this label.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISPOSAL

Do not contaminate water, food, or feed by storage or disposal. Pesticide Storage And Spill Procedures: Store upright at room temperature. Avoid exposure to extreme temperatures. In case of spill or leakage, soak up with absorbent material such as sand, sawdust, earth, fuller's earth, etc. Dispose of with chemical waste.

Pesticide Disposal: Pesticide, spray mixture, or rinse water that cannot be used according to label instructions must be disposed of at or by an approved waste disposal facility.

Container Disposal: Triple rinse (or equivalent) then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved State and local procedures. CONTAINERS ONE GALLON AND SMALLER: Do no reuse container. Wrap container in several layers of newspaper and discard in trash.

Pyrenone Industrial Spray Emulsifiable Concentrate contains piperonyl butoxide, a chemical that increases the activity of pyrethrins. Diluted with water, it is specifically recommended for use in bottling plants, breweries, food processing houses, bakeries, markets, restaurants, stores, hotels, theaters, hospitals, institutions and in other situtations where an effective fast-acting insecticide is required. As a space spray, it gives rapid kill of flying and crawling insects contacted by mist.

AS A CONTACT SPRAY

For best application for an initial clean-up with Pyrenone Industrial Spray Emulsifiable Concentrate, dilute; I gailon of concentrate with four gallons of water and apply in a good machine adjusted to deliver a coarse droplet spray using approximately 1 gallon of diluted material to each 750 square feet of surface. This dilution should not be applied in the edible product areas of federally inspected meat, poultry and tog packing plants. Against roaches, silverfish, crickets, scorpions, spiders, box elder bugs, clover mites and cheese mites with this water diluted concentrate, spray thoroughly all surfaces and areas where these insects are usually found including walls, baseboards, moldings, floors, cabinets, crevices, sinks are pipes, with special attention to cracks, crevices, niches, dark comers, drains and similar hiding places. Treat ant trails, runs and nest, Repeat treatment at a dilution of 1 to 9 at the same rate of application after an interval of a month or repeat as needed.

PYRENONE®

SPACE SPRAY

For rapid control of flying insects, including flies, moths, wasps, hornets, skipper flies, mosquitoes and gnats, dilute 1 gallon of Pyrenone Industrial Spray Emulsifiable Concentrate with 39 gallons of water and apply in a good sprayer adjusted to deliver a fine mist. Direct the diluted spray toward the upper portions of the enclosure, filling the room with the mist and using approximately 2 ounces of diluted material for each 1000 cubic feet of space. Whenever practical, keep doors and windows closed for 10 minutes after application. Do not remain in treated areas and ventilate the area after treatment is completed.

VAPOR SPRAY

Rapid control of all of the insect species named on this label may be obtained through dispensing this concentrate as a vapor. For use as a vapor spray in special electric, steam or compressed air applicators, dilute 1 gallon of Pyrenone Industrial Spray Emulsifiable Concentrate with 9 gallons of water or oil and use in accordance with manufacturers' directions for the type of equipment selected. Dosages vary with different types of applicators, but many special generators are designed to give most effective results when the material is used at the rate of 1 pint to each 8,000 - 15,000 cubic feet of space. In all cases, the dosage should be sufficient to fill thoroughly the enclosure with fog or vapor. Keep the room closed for 4 to 6 hours for best control of cockroaches. Do not remain in treated areas and ventilate the area after treatment is completed.
