

# PYRENONE® GENERAL PURPOSE HOUSEHOLD SPRAY

EPA Reg. No. 4816-336

Effective, Fast Acting Insecticide.

For Use in Homes, Institutions, Restaurants  
and Food Processing Plants.

Kills on contact exposed or accessible stages of:

Roaches	Flies	Wasps	Carpet Beetles
Silverfish	Mosquitoes	Hornets	Fleas
Crickets	Skippers	Sand Flies	Brown Dog Ticks
Spiders	Grain Moths	Clothes Moths	in Buildings
Ants	Gnats	Bedbugs	Cadellés
Flour Beetles	Grain Beetles	Meal Moths	Spider Beetles
Weevils	Meal Worms	Grain Mites	Cheese Mites

**ACTIVE INGREDIENTS:**

100%

Pyrethrins	0.1%
Piperonyl Butoxide, Technical*	0.5%
Petroleum Distillate	99.4%

\*Equivalent to 0.4% of (butylcarbityl) (6-propylpiperonyl)  
ether and to 0.1% of related compounds.

## CAUTION KEEP OUT OF REACH OF CHILDREN.

Harmful if swallowed. Do not spray near or toward an open flame. Avoid contamination of feed and foodstuffs.

Do not remain in treated areas and ventilate the area after treatment is completed.

The use of this product as a space spray in food processing plants should be confined to time periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

**DIRECTIONS FOR USE**

For most effective results against the active stages of flying, running and crawling insects, use in a good sprayer adjusted to deliver a fine mist.

Treat infested areas thoroughly and whenever possible, keep doors and windows closed for 10 minutes after spraying.

**FLYING INSECTS:** For control of flies, including fruit flies, mosquitoes, gnats, sand flies, wasps, hornets and certain other flying pests, direct the spray toward the upper portions of the room and saturate the atmosphere with the mist, using 1 to 2 ounces to each 1000 cubic feet of space.

**CRAWLING INSECTS:** To control roaches, silverfish, crickets, and spiders, spray infested areas thoroughly and direct the liquid behind baseboards, moldings, cabinets, shelves, sinks, door and window frames, and pipes, toward drains and dark corners, and into cracks, crevices, recesses and similar hiding places.

Against ant infestations, treat shelves, cabinets and storage areas; spray ant runs, trails, baseboards, thresholds and other places of entry, and treat nests liberally.

In controlling fleas and Brown Dog ticks in houses, direct the application toward the lower wall portions, baseboards, rugs, carpets and floors of infested areas. Animal quarters, kennels and bedding should also be sprayed.

To control bedbugs effectively, apply liberally to top, ends, sides and bottom of mattresses, spraying thoroughly all tufts, seams and folds. Spray springs and frame, directing the liquid into all cracks and lock joints. Treat walls, baseboards, moldings, floors, closets and bedroom furniture, picture frames, with particular attention to protected bedbug hiding and breeding places.

For most effective control of clothes moths and carpet beetles, remove infested articles from storage, brush thoroughly and, if possible, air several hours in direct sunlight. Apply spray liberally in empty chests, closets, bureaus and storages, directing the liquid into cracks, joints and crevices. After airing, infested articles may be treated by holding the spray nozzle at least 3 feet away from the fabric and applying the liquid lightly to the seams to avoid the possibility of staining. Treat both sides of rugs, carpets and pads, and all exposed and accessible surfaces of overstuffed furniture. Do not overspray if products are made of rubber or are rubber coated, to prevent expansion or swelling. Repeat treatments monthly unless the articles are stored in moth-tight containers.

Home and institutional pantries and food storages frequently become infested with various stored food pests including flour beetles, grain moths, weevils, cadellés, grain beetles, meal worms, spider beetles, meal moths, skippers, grain and cheese mites. To avoid sources of reinfestation, wormy flour, grain and cereals should be destroyed before treatment. Spray thoroughly all surfaces of shelves, bins, cupboards, cabinets, pantries, lockers and similar storages, with particular attention to cracks, niches, crevices and other hiding places.

Pyrenone General Purpose Household Spray is an excellent insecticide for use as a vapor, fog or mist spray in special generators. Regulate dosage in accordance with equipment manufacturers' directions for the particular type of applicator employed. Application should be sufficient to fill the enclosure with the fog, mist or vapor.
