Precautionary Statements**Hazards to Humans & Domestic Animals****Caution:**

Avoid inhalation. Containers larger than one pound may not be used or stored in food handling establishments. This product is a finely divided powder which combines the flushing and killing powers of pyrethrins and piperonyl butoxide with the dehydrative principle of thermally attrited hydrogel. It is relatively odorless and non-staining and may be used in accordance with directions in homes, restaurants, stores, hotels, offices, plants, warehouses, truck trailers and railroad cars. When used as directed, it is highly effective in controlling such insects as ants, roaches, silverfish, bed bugs, fleas, lice, ticks and dry wood termites.

Environmental Hazards

This product is toxic to fish. Keep out of lakes, streams or ponds. Do not apply where runoff is likely to occur. Do not apply when weather conditions favor drift from areas treated. Do not contaminate water by cleaning of equipment, or disposal of wastes. Apply this product only as specified on this label

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

Do not reuse container. Destroy when empty

Applications Within Food Areas of Food Handling Establishments

Food processing plants and warehouses, bakeries, beverage plants, restaurants, supermarkets, meat and poultry processing plants, hotels, motels, hospitals and schools:

Limited to Crack and Crevice Treatment Only Using a bulbous duster apply a small amount of material directly into cracks and crevices such as expansion joints between different elements of construction or between equipment bases and the floor, wall, voids, motor housing, junction boxes or switch boxes, conduits or hollow equipment legs where roaches, ants, silverfish, spiders, and crickets hide. Care should be taken to avoid depositing the product onto exposed surfaces or introducing the material into the air. Avoid contamination of food or food processing surfaces.

Applications of this product in the food areas of food handling establishments, other than as a crack and crevice treatment, are not permitted.

Non Food Areas:

Homes, institutions, hospitals, office buildings, hotels, motels, theaters, schools, truck trailers and railroad cars. To control such running and crawling insect life as ants, cockroaches, silverfish, and fleas in animal quarters, distribute Drione at the rate of 2 ounces per 100 square feet surface area. Apply a continuous visible film underneath and behind stoves, refrigerators and appliances. Treat on, around and behind moulding, shelving, baseboards, pipe openings, cracks, crevices, and other areas where insects may hide. For severe infestations, apply Drione behind cabinets and walls, in crawl spaces and attics, at the rate of 16 ounces per 1000 square feet of surface area. Repeat treatment as necessary

SEWER TREATMENTS: American and Oriental cockroach infestations in sanitary sewers may be treated with approximately 6 ounces of Drione per manhole. When treating sewers, one manhole per 200 feet of line should be treated. Treatments are made by removing the manhole cover and replacing with a disc of plywood bored to receive the usual flexible hose from portable or truck-mounted ventilating equipment, 6 ounces of Drione is introduced into the ventilating air to be dispersed quickly and thoroughly through the system.

Bed Bugs: Take bed apart. Dust into joints and channels. If hollow, such as square or round tubing, see that the interior of framework is well dusted. Mattresses should be dusted, especially tufts, folds and edges. Picture frame moldings and all cracks and crevices in the room should be treated.

Dry Wood Termites: These termites are restricted to certain parts of the country and should not be confused with Subterranean termites. Use an electric or hand operated rotary duster to distribute Drione through an entry e.g., crawl hole into the attic and the crawl space of the building. Rate of application is recommended at one (1) pound per 1,000 square feet of floor area. All wood surfaces must be covered. All vents and louvers on the windward side to be closed.

Fleas: Dog and cats. Liberally apply powder to the animal rubbing thoroughly to the skin. Begin with the neck and include the under body, legs, feet, and the base of the tail. Repeat as necessary. Surfaces of kennels should be dusted at rate of one ounce per 50 square feet. Heavily infested lawns, basements and crawl spaces should be dusted at rate of 16 ounces per 1000 square feet. Repeat as necessary

Warranty Statement: Buyer assumes all risks of use storage or handling of this material not in strict accordance with directions given herewith
