HOUSE PLANT & GARDEN SPRAY

DIRECTIONS

This insecticide may be used on indoor plants or in small gardens, and for spot treatment of persistent insect infestations to prevent spreading in large gardens.

Press button holding opening away from you, and about 18 inches from foliage to be sprayed. Apply when air is still and foliage is dry; avoid spraying in direct sunlight. Avoid visibly wetting foliage. Spray both top and bottom of foliage lightly, using short one-second bursts. Do not over-spray, since very little is needed for effective kill. Direct spray at insects, making sure to contact Japanese beetles. Repeat as necessary.

This spray may be used on African violets, asters, azaleas, begonias, camellias, carnations, chrysanthemums, dahlias, delphiniums, dogwood, English ivy, euonymus, fuchsia, geraniums, crassula, ornamental grape vine, Kentia palm, laurel, marigolds, rhododendrons, roses, rubber plants, snap dragons, stocks, Wandering Jew, and zinnias to kill Japanese beetles, hit by spray, as well as aphids, thrips and spider mites. Also effective against lace bugs, pavement ants, clover mites, and army worms.

Do not use on maidenhair fern, lantana or cyclamen.

CAUTION: Avoid contamination of feed or food stuffs. Avoid breathing of spray or contact with eyes or skin.

WARNING: Contents under pressure. Do not puncture or expose container to temperatures above 130° F. Do not incinerate container.

Do not use near fish bowls or aquaria.

EPA Reg. No. 4816-361

An Insecticide-Miticide for Use on Indoor and Outdoor Plants.

ACTIVE INGREDIENTS:

Pyrethrins	0.026%
*Piperonyl Butoxide, Technical	0.256%
Rotenone	0.128%
Other Cube Extractives	0.236%
Isothymo-chloroethyl Ether	0.313%
Petroleum Distillate	0.102%

INERT INGREDIENTS:

98.939%
100.000%

*Equivalent to 0.205% (butylcarbityl) (6-propylpiperonyl) ether and to 0.051% of related compounds.

CAUTION

Keep Out Of Reach Of Children

See rear panel for additional precautions

Net Weight: 14 ounces
