CAUTION
KEEP OUT OF REACH OF CHILDREN.

See rear panel for additional precautions

NON-FLAMMABLE

NET WT.

Niagara Chemical Division
Middleport, N.Y. 14105

DIRECTIONS FOR USE

Your Brand Automatic Sequential Aerosol Insecticide is designed for use in automatically-timed discharging devices. Using the metered valve provided, which gives a dosage of 100 mgs. set to discharge every fifteen minutes, one unit will control flies, mosquitoes, gnats and flying moths in an area of approximately 6000 cubic feet. Factors such as shape of area, temperature, humidity and air currents all affect insect activity and may modify the exact area protected. Insect control will build up within 2 hours after unit is in operation.

Used as described, this 12 ounce can contains sufficient insecticide to operate 24 hours a day for 34 days. This will provide for monthly replacement. Any remaining contents may be used manually.

To use manually, remove cap and direct spray at flies or other insects, pressing actuator button repeatedly. To treat entire area close windows and doors, and press actuator button 7 times per 1000 cubic feet of space, while moving about to distribute the spray in the upper portion of the room. Keep room closed for 15 minutes and ventilate before reoccupying.

ACTIVE INGREDIENTS:

Pyrethrins	0.9%
Piperonyl Butoxide, Technical*	9.0%
Base Oil	10.1%

INERT INGREDIENTS	80.0%
	<hr/> 100.0%

Equivalent to 7.2% (butylcarbityl) (6-propylpiperonyl) ether and to 1.8% related compounds.

CAUTION

Contents under pressure. Do not store above 120° F. Do not use or store near heat or open flame. Do not puncture or incinerate containers.

Do not install directly over any food handling or dispensing area. Do not use in nurseries or rooms where infants, ill or aged persons are confined.
