INERT INGREDIENTS:	60.60%
	100.00%

Equivalent to 14.19% (butylcarbityl)(6-propyl piperonyl) ether and 3.54% related compounds

KEEP OUT OF REACH OF CHILDREN.

CAUTION

See side panel for additional precautions.

EPA Reg. No. 4816-393
EPA Est. No. 279-NY-1

ACCEPTED

AUG 31 1979

Under the Federal Insecticide, Fungicide, and Rodenticide Act, as amended, for the pesticide registered under EPA Reg. No. 4816-393

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION

Do not use in nurseries or rooms where infants, ill, or aged persons are confined.

PHYSICAL OR CHEMICAL HAZARDS

Contents under pressure. Do not store above 120°F. Do not use or store near heat or open flame. Do not puncture or incinerate containers.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE AND DISPOSAL

DISPOSAL: Wrap container and put in trash collection.

To be used indoors wherever these insects are an annoyance: in Food Processing Plants, Restaurants, Hospitals, Homes, Stores, Hotels, Motels, Schools, and other Public Buildings; in Dairies, Barns, Canneries, Breweries and Food Handling Establishments.

Your Brand Automatic Sequential Aerosol Insecticide is designed for use in automatically-timed discharging devices. Using the metered valve provided, which gives a dosage of 100 mgs. set to discharge every fifteen minutes, one unit will control flies, mosquitoes, gnats and flying moths in an area of approximately 6000 cubic feet. Factors such as shape of area, temperature, humidity and air currents all affect insect activity and may modify the exact area protected. Insect control will build up within 2 hours after unit is in operation.

Used as described, this 12 ounce can contains sufficient insecticide to operate 24 hours a day for 34 days. This will provide for monthly replacement. Any remaining contents may be used manually.

To use manually, remove cap and direct spray at flies or other insects, pressing actuator button repeatedly. To treat entire area, close windows and doors and press actuator button 7 times per 1000 cubic feet of space while moving about to distribute the spray in the upper portion of the room. Keep room closed for 15 minutes and ventilate before reoccupying.

Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using. When using the product in these areas, apply only when the facility is not in operation.

Buyer assumes all risks of use, storage or handling of this material not in strict accordance with directions given herewith.
