

[4816-428]

INSTRUCTIONS

This product is a semi-concentrated pyrethroid insecticide. It is used as a space spray in food processing plants. It is a fast-acting, broad-spectrum insecticide. It is effective against a wide range of insects, including flies, mosquitoes, and beetles. It is also effective against some mites and ticks. It is a non-flammable, non-toxic, and non-corrosive product. It is suitable for use in food processing plants, restaurants, hotels, and homes.

The use of this product as a space spray in food processing plants should be limited to short periods when the plant is not in operation. Foods should be removed or covered during treatment. All food processing surfaces should be covered during treatment or thoroughly cleaned before using.

SPACE TREATMENT: Close doors and windows and shut off ventilating systems. Apply as a fine mist, distributing the spray throughout the area. Use at a rate of 1 ounce per 1000 cubic feet of space. Do not spray behind and under structures and contact crawling insects whenever possible. Keep area closed for 10 to 15 minutes. Aerate treated area and ventilate before re-occupancy. Repeat treatment as necessary.

The above described application will still be effective against a wide range of insects, including flies, mosquitoes, and beetles. It is also effective against some mites and ticks. It is a non-flammable, non-toxic, and non-corrosive product. It is suitable for use in food processing plants, restaurants, hotels, and homes.

PRECAUTIONS: Do not use in areas where food is being prepared or served. Do not use in areas where children are present. Do not use in areas where pets are present. Do not use in areas where people are present. Do not use in areas where people are present.

Keep out of reach of children. See rear panel for additional precautions.
